Thread: [How's everyone feeling?](#)

zFacetious - October 23, 2021, 7:34 pm

Title basically says it all, more specifically how are you feeling with the changes that the world has taken due to covid? (If you feel unaffected by the changes, than how are you feeling in general)

For me it saddens me to see my family a lot less, my spouse and I unfortunately are unable to go on dates as often and our child doesn't get to see other kids that often, it has been hard on us for sure.

LeetSpeed - October 23, 2021, 7:38 pm

That's awesome! Do you find you life changed at all from the slow down and closing of many countries?

No I've lived my life pretty much the same before all this happened.

I hate the new traveling restrictions, sadly i think they are going to stick for a long time

For the longest time it was against the law to have gatherings with others not from your house hold and they live in small towns hours away they'd get reported, my kids day care closed and others are afraid to visit, and most activities were shut down for dates

(Oct 23, 2021 07:55 PM)LeetSpeed Wrote: [\[CITE\]](#) They shut everything down on your side?

Yes they did even like essential stores had limits of customers so you'd wait in line for an hour to get milk

Yep for we have 2 kids and the church is only allowed 50% capacity for the service and we don't wanna risk the children to be expose to many people that why we choose to get the online service rather than going along with some other members on the church.

That's a good plan that and with four people that's potentially four others who may not be able to attend who are unable to do it online

I'm doing pretty good, been knocking out assignments and studying most of the day. Time to relax now. As far as the question goes, my life has changed a lot but not because of Covid. I'm a lot busier, have more going for myself, and more responsibilities but they're all good things.

Our first dose was just this last 12th day of October and it will be 3 weeks apart before we get back on the vaccination site to take the 2nd dose.

Do you experience and side effect or any inconvenience for your first and 2nd dose of pfizer?

Basically, I believe that restricting anyone without actual cause (like murder, theft or something similar) is a violation of human rights, it shouldn't be ok to force people into getting something injected into them, period.

In some places you can get fired from your job if you aren't vaccinated, and without compensation, and that's LEGAL!!

People being denied entrance to restaurants or hang out places because they refuse to share information that is technically illegal to even ask to see as there is a thing called "Medical confidentiality", and even if they do share that info and it shows they weren't vaccinated they would still be denied entrance, so yes, I think the world has gone fucking ape shit over this covid thing

Yea I remember at the start of covid my work place wasn't aloud to ask us for covid results if we were off sick, now it is mandatory no matter what we are off work sick with that we not only get a test, but show them the test and then be 48hr symptom free to return

A) All over the world scientists and doctors dropped all other projects to work on the Covid vaccine so that you can't really judge the number of hours that were put into the vaccine compared to other vaccines where this wasn't the case.

B) The vaccines were tested on volunteers in 2020.

C) There is almost zero history of vaccines in general causing "long term side effects" that whole online furor is just propaganda put out by people who hope to gain votes in future elections by making people paranoid about the vaccine.

D) There were "proper tests" on three of the vaccines that's why they got full FDA approval.

E) The reason that authorities around the world started pressuring people heavily to get them is because vaccine science is such that vaccines will not work to crush and eliminate disease unless a very high percentage of the population takes the vaccine because no vaccine is 100% effective, and vaccines in general work a lot less well on the elderly and the immune compromised.

And the BIGGEST reason on top of that is that hospital systems will frankly collapse if Covid is just allowed to spread like wild fire with its incredible contagiousness. I don't know what part of "hospitals don't have unlimited, infinite amounts of hospital beds" people don't understand.

Yes a lot of people get Covid and don't die. That's NOT the point. The point is how insanely contagious it is, which would still lead to huge amounts of people ending up in hospital if we never did all these public health measures, Hospital systems can't cope with a gazillion numbers of Covid patients on top of everything else that puts people in hospital.

And the funny part is that the whole POINT of vaccines was to get rid of lockdowns and masks and all the stuff to keep the hospitals from being overwhelmed. All the public health measures that people hate but the very same people that whined the most about lockdowns and masks, whine the most about the vaccines, and won't take them, leading lockdowns and mask wearing to just continue on and on. It's not authorities "dragging Covid out" it's you.

Unfortunately this ties into my other thread today on Facebook a large group of people see a headline that it was developed to quickly compared to other vaccines, not taking into account that we are much more advance in medical science and had the entire world on board to do so.

The medicine I take is like, you take it because of depression, but once you take it, it takes like 1-2 weeks for it to start working, and those 1-2 weeks you get a even worse depression, like way way deeper before it starts to take "action"

So...

A) no arguments here except for the fact that it was developed by private companies who sell it to

you, not by those scientists who were working on it with other countries.

B) True, they were tested, but not on a big crowd as required to show actual results and statistics for side effects.

C) As true as it might be, most people would still rather have these things tested BEFORE the vaccine gets injected into them.

D) False, it got an Emergency approval by the FDA and only recently received the actual approval (after almost the entire state of Israel got it) , so when it was released it actually didn't get the proper tests to get the approval.

E) As true as it may be, there were always people who were against vaccines and there probably always will be, forcing people just causes these communities to grow and helps them with their fake news campaigns and not the other way around, I'm not saying that NOTHING needs to be done, but there were other ways to handle this crisis, I've stated this the moment it started.

Yeah really got nothing to complain about, we all get our hand of cards and all we can do is play them.

Regulus - October 25, 2021, 6:21 am

Feeling decent today I guess.

Feeling great at the moment. Yesterday, my wife and I finished assembling our tall boy. Today after work, we will assemble TV table.

Bench Press - October 25, 2021, 7:41 pm

Hey I'm feeling great. Hit a new bench press max today.

Nice how much are you pressing?

Yin Yang - October 26, 2021, 6:11 am

Not too shabby, thanks for asking

Monero-chan - October 26, 2021, 7:49 pm

I've been feeling pretty tired lately, college is a bitch sometimes.

lol - October 26, 2021, 8:23 pm

At the moment, I'm feeling really tired. Assembled TV table yesterday after work. Today after work, I'm going to setup the TV. How exciting...

Baby - October 26, 2021, 8:29 pm

Feeling solid, feeling good back at work, new laptop coming next Wednesday. Weekend to enjoy. We good!

Louis Vuitton - October 26, 2021, 8:50 pm

I'm feeling like a million bucks

Envy - October 26, 2021, 8:52 pm

Feeling really good today, had a super productive day and made some money.

New weed too.

Wishing the best for everyone else.

Ninja - October 30, 2021, 7:04 am

I still feel the every day normal. It sucks what happened to the world as of late, though.

Allelujah - October 30, 2021, 8:15 am

Feeling like I don't wanna work today. It's raining and raining is good sleeping weather.

Jinu - October 30, 2021, 8:34 am

I'm feeling exhausted right now after a long travel.

fredo - October 30, 2021, 11:08 am

I'm feeling good I hope everyone has a positive & productive day today!

Regulus - October 30, 2021, 11:09 am

Feeling decent I guess.

Could be a lot better though, depression has been hitting me all day today, but we all have those days I guess.

Nate - October 30, 2021, 1:10 pm

Feeling pretty good, I just want to go back to work but I'm recovering from surgeries

Bench Press - October 30, 2021, 2:30 pm

Hey, I'm feeling okay. A little low on the productive side, but overall, happy.

Moruq - October 30, 2021, 4:18 pm

You shouldn't lose motivation from COVID. If anything you should be looking for ways to self motivated again rather than looking at the negatives.
