What do you mean? Just add a direct link to your .exe  
Keep in mind the silent exploit will only work with very specific versions of office.

Not newer office.  
There are no silent exploits for a feasible price that work on office 365.  
And no, you cannot attach to gmail.

Make sure you know what you're buying.  
It looks like there was silent exploits on office 365 and i believe more then 50% users have not updated office 365 to latest version.
