Thread: [BlackNet Download and Execute](#)

Palac10 - October 26, 2021, 1:39 pm

Hey guys I am trying to use BlackNet, as a loader. Does anyone know if it has Download and Execute functionality?
I don't see it on the list.

Check my sig if you want to follow the development progress of one coming to HF soon, in the meantime, you'd need to have a look around github, can't link any since I'm yet to find a good one
check his thread :)

I just checked your thread. When do you plan on releasing it? It's beautiful.

I would definitely take the advice above by @Incog on this one.

Young Sosa - October 27, 2021, 4:16 am

first of all you need a botnet source specifically targeted to be ran as LOADER, not other sources USED AS "loaders", otherwise this will just result in a not supported botnet, not supported bots functions or not well coded for the use you need.

Why waste your time and energies for a botnet that will just ruin your clients?

Before using a specifically source it's better to study the botnets functions & features, otherwise I will never stop to suggest hiring a personal dev for coding your own source for your personal needs.

If you don't have money use a free open-source (ALWAYS AVOID CRACKED SOURCES, BINDED BUILDERS, BACKDOORS ETC ETC...).
