Thread: [Crypt & Protection Disabler / 32 & 64 bit / .net and Native WIN 10 & 11](#)

OverW4tch - October 30, 2021, 2:58 pm

Crypter/Protection Disabler

[Video: <https://vimeo.com/640756770>]

I'm selling a crypter that can disable Antiviruses.

Currently disabled AVs are:

Code kaspersky

avast

eset

norton

windowsdefender

adaware

avg

mcafee

trendmicro

malwarebytes

comodo

bitdefender

baidu

sophosendpoint

iobitmalwarefighter

360totalsecurity

SystemIntegrityCheck

ZoneAlarm

Webrootsecureanywhere You can see the video above (avast and eset are shown as example) the antivirus gets completely disabled so you'll be able to load any program you want as if nothing is protecting the computer, the crypter/disabler comes also with startup so it's permanent and very hard to remove (the only solution is to restore the PC).

Programs like IoBit Advanced System Care (for example) won't be able find the startup and they'll not be able to remove the program once it's installed. The reason is because my program does not use a common startup method (like regkeys or tasks), the startup takes over the windows update feature in order to disable it and stops updates.

1)Startup feature comes with Admin Privileges on every boot

2)The crypter works with 32 and 64 bit payloads, .Net and Native.

3)Windows 10 and 11 supported.

4)Once the startup has installed it's removable only by formatting the PC.

5) Process protection feature: you can choose which processes can be started and which processes can be closed.

6) Persistence: your crypted program cannot be closed.

I'll give more info privately.

Updated prices:

Crypt without startup : 400\$

Crypt with startup: 800\$

Builds are customizable, anything can be done if you ask me.

Contacts.

you can add me on discord : OverW4tch#9586

or send me a private message/convo here on hackforums

Ok I've sent you a private message

Transporter007 - November 1, 2021, 7:56 am

Can I get a vouch copy?

If it works than I will buying 1 crypt per week and 4 crypts in a month.

Does this work with Pure Miner?

Palac10 - *November 4, 2021, 9:08 am*

I am interested in knowing if this works with Pure Miner too.

OverW4tch - *November 4, 2021, 10:07 am*

Yes it works with miners for max compatibility you can just bind the disabler file with your miner...
Otherwise some types of injections can be used
