Does anyone know if it's still possible to buy FUT coins without getting banned these days?

Yes it is, i bought via fifacoin, everything went smooth, and You wont be banned on the first notice, they remove Your coins (5% chance) just use all of Your coins.

So if you quickly use all your coins on players, they can't/won't remove your players?

They wont ever remove cards/players, they can only remove coins that are not spent, and chance for that is like 5%, i bought over 400.000 coins and was fine, via player trade.

What do you think of mmoga? Their prices seem a LOT lower than every other site I've looked at so far.
