Thread: [Metaverse Projects](#)

Sensitive - November 1, 2021, 11:21 am

As I can see we are at the start of a new trend of Metaverse

I already did my shopping on that and got some good projects (as of my research).

That might be as with NFT's, first it was a trend that eventually faded, and in some months we got a mega pump on all NFT projects. I suspect that we are in the first phase with Metaverses at the moment.

Any thoughts, ideas, projects that you have invested in. I am really interested in your point on this. What to keep it more like a discussion thread, so I didn't write my chosen projects. :rocket:

SA777OSHI - November 1, 2021, 11:26 am

Did you invest in MANA already? Seems like a good project, also you should share the projects you invested in.

Yin Yang - November 1, 2021, 11:31 am

The news is def starting to cool down. Might want to wait a little, and then buy, like you said.

Which projects you looking at? KuCoin does have a Metaverse section.

Yes, I have some MANA, bought it way earlier then all then metaverse trend started, it's a part of my long term investments. The decision on this was made based purely on diversification of my portfolio at that time. (I am ~x3 at the moment with this one, not looking to sell at the moment)

At the moment I have increased my exposure to metaverse projects.

I don't want to share my projects, because when people read a thread they tend to just check the projects and not write any of their thoughts on the subject.

Yes, the biggest part of the coins are indeed on KuCoin, but their metaverse section is limited, there are way more projects to check.

Many of them are not even stating the word metaverse, but they are doing exactly that.

So you want others to share their projects they're invested in. But you won't? Lol ???

No, I don't. I just want to discuss the subject, sharing the projects is optional and they should decide to do that or not. Way easier just to shill your coins right? Lol?

I am more interested in what people think of this trend in general, are they into any of metaverse projects and what they can see for the future.

Maybe making another thread where everybody just throw their coins and say that this will moon. GI

Mudhoney - November 2, 2021, 12:10 am

Enjin is one of them, which probably explains the recent pump to \$3.47.

Yeah, ENJ is very good. I traded it multiple times and luckily I got ENJ till today. Not selling! This is one of projects that I am very confident in. ?

Suggestion - November 2, 2021, 8:05 am

Wish I never sold my ENJ before. But still got some. A good project.

Mudhoney - November 3, 2021, 1:21 am

Been holding ENJ since ICO, don't think I'll be selling my gold mine for a long time

Angel - November 3, 2021, 2:28 pm

Here is a metaverse project:

<https://coinmarketcap.com/currencies/star-atlas/>

Easy 10x from here + its on Solana ecosystem (Top 4 ranking on CMC)

Yin Yang - November 3, 2021, 4:01 pm

I just bought blok during the dip. Hope it works out.

Echoz - November 3, 2021, 9:23 pm

Just looked into \$CUBE on gemini. Seems really interesting. Gaming in browser.

Sensitive - November 4, 2021, 1:26 pm

#NAKA looks like a good short to mid term investment at the moment, if there is someone interested check this one, it's a must.

It's at a good entry point at the moment, there are some questions about their circulating supply and market cap, DYOR.

?OMEGA? - November 5, 2021, 1:53 pm

Look into MetaHero #HERO.

Yin Yang - November 5, 2021, 2:54 pm

Stop sleeping on blok ? Only time until Binance listing

Mobiloitte - April 5, 2023, 12:55 am

Hi dear,

I can tell you that the concept of Metaverse is still in its infancy, and its potential impact on the world of technology, entertainment, and social interaction is enormous. As with any emerging technology, there will be opportunities and risks associated with it, and it's up to individuals to make informed decisions based on their own research and risk tolerance. It will be interesting to see how this space evolves in the coming months and years.
