Thanks for buying, hope you enjoy the product! ?

aminesbari - November 2, 2021, 12:02 pm

Hello, the bin are 32 bit or 64 bits ?

Scrubspooof - November 2, 2021, 12:46 pm

(Nov 2, 2021 11:14 AM)Incog Wrote: [\[CITE\]](#) Where is the credits on the thread design?

You didnt make this so why was credits removed

(Nov 2, 2021 12:02 PM)aminesbari Wrote: [\[CITE\]](#) Hello, the bin are 32 bit or 64 bits ?
The miner is 64 bit. You can't mine XMR on a 32 bit machine.

Scrubspooof - November 2, 2021, 1:16 pm

I'm working on adding ETH to Future Miner. So when user mines XMR with CPU, it will mine ETH with GPU. ETA: 1 week!

VIDEO OF MINER ADDED.

Lrrr - November 3, 2021, 5:48 pm

Dude, this looks really cool. Posting here to remind myself to come back later.

cr1m3sd3r0 - November 4, 2021, 4:00 am

What the stealer can do bro ? can u tell me i have already the miner but i didn't see`it this stealer when i made the mine 2 weeks ago ?!

damn - November 4, 2021, 7:13 pm

Excited to try this, how many miners can it support?

Scrubspooof - November 4, 2021, 7:35 pm

(Nov 4, 2021 07:13 PM)damn Wrote: [\[CITE\]](#) Excited to try this, how many miners can it support?
There is no c&c, so as many as your proxy or pool can handle.

Binding feature has been removed as it was causing runtime detection.

I've finishing adding ETH/GPU mining (Not only ETH, support for thereum, Ethereum Classic, Metaverse, Musicoin, Ellaism, Pirl, Expanse and others). It will mine XMR with CPU and ETH with GPU. Also added anti-vm and debugging (Checking for debugger programs, checking for virtual disk, verifying MAC address, IsDebuggerPresent) and will add more. Price for builds will rise soon, as we add features. ?

Call Me Shelter - November 4, 2021, 10:31 pm

Hello is it FUD or UD ? can I see the AvCheck ?

Scrubspooof - November 4, 2021, 10:43 pm

(Nov 4, 2021 10:31 PM)darxebb2012 Wrote: [\[CITE\]](#) Hello is it FUD or UD ? can I see the AvCheck ? Only detected by ESET right now without startup. With startup it has 1 detection, but by a different AV (avast)

Call Me Shelter - November 4, 2021, 11:02 pm

(Nov 4, 2021 10:31 PM)darxebb2012 Wrote: [\[CITE\]](#) Hello is it FUD or UD ? can I see the AvCheck ? Good :)

So this is without any crypter, this is only the result of the fill .exe binded ?

Unixroot™ - November 4, 2021, 11:06 pm

wondering if you are using telegram?

Scrubspooof - November 4, 2021, 11:10 pm

(Nov 4, 2021 11:02 PM)darxebb2012 Wrote: [\[CITE\]](#) Good :)

So this is without any crypter, this is only the result of the fill .exe binded ?

We no longer support binding as it causes detection. Yes, this is without any crypter. If you have a crypter that will crypt native 64 bit binaries it should work.

(Nov 4, 2021 11:06 PM)Unixroot™ Wrote: [\[CITE\]](#) wondering if you are using telegram?
Contact: @masonlong (telegram)

Edit:

Miner has been RE-FUD!

fxweezy - November 5, 2021, 1:57 pm

Someone has purchased this miner ?

Scrubspooof - November 6, 2021, 3:30 pm

Let me tell you all a little more about Future Miner.

If the user does nothing for specified periods of time then the miner will use 25%, 50% and then 100% of the CPU/GPU. For example when someone plays a game it is on 25%. When someone is not doing anything (no mouse movement) it is on 100%. The watchdog timer checks periodically if any of the GPUs freezes and if it does, restarts the miner.

Scrubspooof - November 8, 2021, 1:28 am

We are online and accepting sales! If you have any questions feel free to post in the thread! Thank you.

Scrubspooof - November 8, 2021, 11:39 pm

(Nov 8, 2021 09:57 AM)dennisdid Wrote: [\[CITE\]](#) pasted of free silent miner
Thanks for the free bump. ?

I had defended against this accusation before and I will explain once more.

Free Silent Miner is written in VB.NET. Dot Net required dependencies and is not convertible to GO lang, which compiles dependency free (native).

Future miner is 100% hand written and no code was stolen. Nothing is copy paste, and we continue development every day to expand the product, add new features, eliminate scantime detections, and reduce heuristic based runtime detections. We use custom code and a private runpe: this is why our product will bypass windows defender runtime without any problems (WITHOUT A CRYPT).

If anyone has questions or comments related to the Miner please feel free to post here in the thread.

donwannyw - November 9, 2021, 1:02 am

does this crypter work on revcode android rat web monitor

Scrubspooft - November 9, 2021, 3:41 am

(Nov 9, 2021 02:02 AM)donwannyw Wrote: [\[CITE\]](#) does this crypter work on revcode android rat web monitor

This isn't a crypter..

Anyway.

Without any updates the miner is still FUD ?

final99 - November 9, 2021, 6:42 pm

Hello scrubspooft,

this looks very promising and I'm interested. I'm just wondering how it's undetectable by all AVs, do you take measures to make it fully undetectable? Is there like a guarantee this will stay fully undetectable or do you recommend preparing to crypt it sooner or later to prevent detection?

Cheers

qcoom - November 9, 2021, 11:07 pm

file size? will there be a panel in the future? thanks

fxweezy - November 10, 2021, 7:19 am

I have tried this miner and the code is written in go and is fud if you use avcheck scanner , but the exe file written in go after running in memory downloads other exe files needed to mine eth or xmr which are not fud at all , however Scrubspooft told me that the exe files for mining are executed directly in the ram memory so they cannot be detected by antivirus , so that everything remains fud the same

Scrubspooft - November 10, 2021, 12:12 pm

(Nov 10, 2021 12:07 AM)qcoom Wrote: [\[CITE\]](#) file size? will there be a panel in the future? thanks 1.7-2.6mb depending on what settings you choose. Working on panel, should be done saturday.

(Nov 10, 2021 08:19 AM)fxweezy Wrote: [\[CITE\]](#) I have tried this miner and the code is written in go and is fud if you use avcheck scanner , but the exe file written in go after running in memory downloads other exe files needed to mine eth or xmr which are not fud at all , however Scrubspooft told me that the exe files for mining are executed directly in the ram memory so they cannot be

Thank you in advance for your reply.

Sir are you familiar with private runpe? ? It uses private process hollowing to inject PE in suspended process using only native API

(Nov 16, 2021 05:57 PM)PR1V473 Wrote: [\[CITE\]](#) If it is okay I'd like to purchase this, but change from ETH to ETC. Essentially just a different miner!

We are expanding the miner every day. We will support more coins eventually. ?

Mr.Pickles - November 16, 2021, 7:04 pm

Commenting here for, will be buying in the future

Edge of Nowhere - November 16, 2021, 8:43 pm

Rare that you see something coded in Go. Features look pretty solid and to top it off, it's affordable.

Scrubspooof - November 16, 2021, 9:22 pm

I have replenished 1 month keys.

PR1V473 - November 17, 2021, 12:36 am

Could you be willing to add the ETCClassic mining soon? Once that is available I purchase, because realistically not many bots have 6GB+ GPUs to mine with... So essentially with a 1660 or 1550 or 1080 or something, you would waste the bot and mine XMR only.

Scrubspooof - November 17, 2021, 1:02 am

Fresh Scanned

The Masked Pear - November 17, 2021, 2:32 am

Hello,

You answered to everyone but not me...

Here is my question:

Does it work with both AMD and Nvidia GPU ? or only one of these?

Thanks !

UNAM's miner requires .net dependencies, while our miner is native and does not require .net like every other miner on the market. ?

UNAM's miner is not FUD, UNAM's miner does not bypass anything runtime. Code is over used and incredibly detected. Our code is original and undetected. There is NOT ANOTHER GOLANG MINER ON THE MARKET.

Let me know when you want to buy our miner and I will assist you or you can use our autobuy shop on sellix.

XXGTA - November 24, 2021, 8:12 pm

(Nov 25, 2021 10:49 AM)NotKover Wrote: [\[CITE\]](#) It is posted on page 1 but this is also the link, Thats for the panel only.

Also asked some questions in telegram 48h now no answer .

Unam offer free miner and yet he answer all the questions.

And it's a fact.

Comrade - November 26, 2021, 6:26 am

(Nov 26, 2021 06:21 AM)Hellmagers Wrote: [\[CITE\]](#) Are you planning on adding a crypto clipper? Would be nice to have as an extra.

Hello,

If i am not wrong.....

its not allowed to advertise/sell on HF with CryptoClipper option included....

Scrubspooof - November 26, 2021, 5:47 pm

Version 2.5 has been released. Existing owners please contact me to receive the update. New auto-buy purchases will include the newest url to download the software.

Update list:

- *Added live hashrate

- *Fixed map

- *Fixed country list

- *Added Future Antivirus(botkiller)

- *Added working when panel is offline

- *Added ETC and other cryptos supported by LolMiner(Changed PhoenixMiner to LolMiner)

- *Added bot knocking every 30secs

- *Added panel download button in builder

*Added Auto Updating. Once you have this version you won't need to contact me again for updates it will be automatic

- *Bugfixes

FutureMiner v2.5 now supports:

- *Monero

- *Ethereum

- *Ethereum Classic

- *Callisto Network

- *Metaverse ETP

- *Expanse

- *MOAC

- *Cortex

- *Bitcoin Gold

- *BitcoinZ

- *Aeternity

- *Flux (ZelCash)

- *Beam

- *MimbleWimbleCoin

- *Grin

- *Ergo

2.6 (which will release over the new autoupdate) will include Download an Execute. Should be 24-72 hours on that.

Assang3 - November 27, 2021, 3:17 am

Now this is starting to look like a proper competitor. Nice work dude, Good luck with sales

Scrubspoo - November 29, 2021, 3:35 pm

An update has been pushed to the panel. Please download the new panel from the builder.

Download and execute will soon be added.

Future Stealer will soon be merged into Future Miner, and we have been working on Future Crypter!

More updates soon.

Scrubspoo - November 30, 2021, 5:00 am

Future miner mines 25% while the user is active. It mines 0% if they open a game, full screen video, or open task manager (it will also kill itself if task manager is open and re-spawn itself when its closed.) It will mine 100% if the above aren't open, and there hasn't been mouse or keyboard activity for 15 seconds.

SIM-5091389 - December 1, 2021, 8:03 am

Scrubspooof Wrote: [\[CITE\]](#) The price of Future Miner will rise when the stealer is done being merged with the miner

Any idea when this will happen? I really want to purchase, but I am waiting until I get paid. When it

merges, what will the new price be?

GSLLL - December 2, 2021, 12:20 am

[quote="Scrubspoo" pid="61173618" dateline="1638307124"]

The 1 Month option has been removed entirely. The price of Future Miner will rise when the stealer is done being merged with the miner. Logs will be sent to the PHP Panel. Download and execute and uninstall will also be added.

Buy Lifetime for \$89.99 while you can before the price goes up!

Maybe it would be wiser to develop a miner with high quality, and not mix all the programs (as a result, there will be a lot of functions, but there will be no quality of work)?

NotKover - December 2, 2021, 6:37 am

Does the miner panel work for everyone? The panel does not work for me (I set it up by video).

Scrubspoo - December 5, 2021, 9:38 am

(Dec 5, 2021 07:20 AM)GSLLL Wrote: [\[CITE\]](#) Does the miner panel work for everyone? The panel does not work for me (I set it up by video).

80% of our customers have it working.

New update adding Future Stealer to the miner will come out in the next few days. Recovered information will be sent to the new version of the panel (one c&c).

The builder will be simplified in this release, allowing you to create miner config automatically with your info, so the miner will work flawlessly!

We will also re-fud with this release.

More coming soon.

[quote="Scrubspoo" pid="61181069" dateline="1638725885"]

80% of our customers have it working.

Why doesn't the panel work for everyone?

I've tried installing on a VPS, home PC, hosting, virtual Windows and it doesn't work anywhere. Support does not give an exact answer.

How do I fix the problem? I paid you for fully working software, not half.

Why is it not indicated in the description of the miner that the panel does not work for everyone?

Scrubspoo - December 5, 2021, 12:14 pm

(Dec 5, 2021 10:58 AM)GSLLL Wrote: [\[CITE\]](#) (Dec 5, 2021 10:38 AM)Scrubspoo Wrote: [\[CITE\]](#) 80% of our customers have it working.

Why is it not indicated in the description of the miner that the panel does not work for everyone?

It only doesn't work if you don't install it correctly.. I'm saying 20% of our customers are too ignorant to install the panel successfully as they clearly don't know how to set up a LAMP stack and import a mysql database, and this is exactly the reason why we no longer offer support for installing the panel.

And if you take a quick look at the market contract you agreed to when you signed the contract it says "Product sold as is. Absolutely no refunds under any circumstances."

You were delivered the product, as is. We have no obligation to hold anyone's hand.

12/5/2021

How does the PHP C&C work?

Install the PHP panel on any windows or linux box

When you will want to change something (address,pool,speed, etc), you will just need to edit the config on the panel.

you mean, I can install it in my own pc and If I shutdown my PC/Linux machine I will not lost connection ?

I can control my bots from local host ?

Do I need to add custom domain for not to lose any connection ?

Or, If I buy a domain and hosting and domain got banned then will I lost my control ?

Please, I need some more explanation. Sorry for bad english.

I just mean ,How can I get control back If my domain got banned.

and is there any tutorial how to use proxy ?

There is a video showing how to setup the panel but not yet for the proxies but i will try to do it as soon as i can.

ScrubspooF - December 12, 2021, 12:41 pm

Price has been updated. 6 Months is now \$89.99, and Lifetime is now \$149.99.

Maydayy - December 12, 2021, 12:55 pm

i don't know how to use.

Can anyone help me?

shakur123 - December 12, 2021, 1:27 pm

Damn this software is amazing!, [ScrubspooF](#) was kind enough to give me a license for the miner and im absolutely excited and happy with it. 100% recommended!!

Lovesosa - December 12, 2021, 2:25 pm

im intrested in this product and will send you a few questions about it

V.V.V.V.V - December 12, 2021, 3:13 pm

Vouch!

Just bought lifetime, the deal went very fast without any problems.

Told OP what I wanted and paid, he delivered it.

The setup is very easy and straightforward.

qcoom - December 13, 2021, 5:05 am

the best miner! bots last a long time!

Deamon1 - December 13, 2021, 9:36 am

Hi I am hoping someone can help me setup Future Miner. LAMP stack already installed and panel working fine, the problem I have is trying to build a miner. I don't seem to be able to do it unless I set up the stealer but I am unsure of the FTP settings. I have tried linking to the index.php file in the sql database but nothing works. I am probably missing something simple but could really do with a hand?

kingboyd - December 13, 2021, 12:08 pm

No need to setup FTP or SMTP details on the stealer. You can leave those blank and the logs land directly into the panel.

The only thing you should need to put in that page is the Interval setting.

The only place you need to enter your Server settings is in "installation settings". Be sure to include the http:// part when linking to your index.php

Ph4n70M Phr34K - December 13, 2021, 1:21 pm

can you tell me:

- bin size
- language it is coded in

Deamon1 - December 13, 2021, 1:29 pm

If you do remote miner it should be about 3~ MB

(Dec 14, 2021 03:21 AM)Miraeoss Wrote: [\[CITE\]](#) Is there any crypter that you recommend and can vouch for?

I would advise to look on other forums for crypters until the crypter scrubspoo is released and also remember the main bin is 64bit so the crypter will need to support 64bit

Mordor - December 14, 2021, 12:58 pm

Hi Guys does anyone know how to set up remote mining??

kingboyd - December 14, 2021, 4:49 pm

Which directory does xmrig run from, and does the dropper include winring0x64?

The Winring driver significantly increases hash rate, and should be placed in the same directory as xmrig. I'd like to know if Winring driver is included, and if not, which directory xmrig runs from so I can drop Winring there manually.

Also, if this is run under a certain user account, and that user logs out. Will it continue to run in the background?

Scrubspoo - December 15, 2021, 6:22 am

Also, if this is run under a certain user account, and that user logs out. Will it continue to run in the background?

The dropper does not include winring0x64.

If the user logs out, it will stop running.. so will everything else on that user account.

(Dec 14, 2021 01:58 PM)Mordor Wrote: [\[CITE\]](#) Hi Guys does anyone know how to set up remote mining??

Host the xmrig and lolminer files and link to them in the builder.

PinkPanthers - December 15, 2021, 7:30 am

(Dec 15, 2021 07:22 AM)Scrubspooof Wrote: [\[CITE\]](#) The dropper does not include winring0x64.

This works on computers without mining-capable GPU's right? because lolminer doesn't. Brought this and scrubbing my brain to get it working, im used to network pentesting stuff lol

Scrubspooof - December 15, 2021, 7:43 am

(Dec 15, 2021 08:30 AM)PinkPanthers Wrote: [\[CITE\]](#) This works on computers without mining-capable GPU's right? because lolminer doesn't. Brought this and scrubbing my brain to get it working, im used to network pentesting stuff lol

XMRIg will mine with CPU either way, even if GPU isn't capable based on GPU memory.

lil rice - December 15, 2021, 7:43 am

This is going to be my completed review on Future Miner V3 since I have purchased the lifetime package for \$150 dollars. If you are looking into buying Future Miner V3 I highly recommend reading this review before purchasing as you may want to reconsider purchasing based off my experience that I had the last couple days with Future Miner V3 itself and the team of individuals that are running this project. Let the review begin

I don't know where to truly start when it comes to this project. Future Miner V3 is listing itself as a premium HTTP Botnet Mining panel, but it truly is anything but that. Future Miner V3 does have a design that is catching and appealing to the eye, but the actual product itself and the functions it claims to do does not work or is buggy. Reaching out to the developer or a support member for help is practically useless as they will not resolve your issues or give you a response that is inaccurate to the actual issue you are having. Listed below I have created three separate categories to make this review more organized and not as some big rant. Because as a customer I am dissatisfied with customer support and the overall customer experience of this product.

Developer of Future Miner V3;

The developer of Future Miner V3 has absolutely no people skills and does not know how to communicate with people what so ever. The developer is a straight up asshole who only cares about making money and taking your money. It is clear as day, because before I purchased Future Miner

V3 the developer was a very nice guy, answered my pre-sale questions, etc. After I purchased Future Miner V3 he turned into a complete asshole, refused to help me and then started ignoring me. He tried to claim my issues were with the RDP I was using or something I was doing wrong but I quickly ruled this out when I tested other botnet sources I had and they worked perfectly fine on my RDP. After I confronted him and told him this he then would give me another reason why it wasn't working and would never take the ownership that his tool is simply broken and poorly coded. For the hefty price tag of this tool I expected something that is somewhat stable, I understand that nothing is perfect but this is just purely broken. When I would execute my stub to my clients to transfer them from redline to Future Miner V3 my clients would disappear after 10 minutes. I asked the developer why this was and he claimed that it was an issue he has never seen or any other customer has had, but I found out that actually a few others were having the same issue as me, bots do not last longer than 10 minutes on Future Miner V3. The log feature barely works and the user logs legit just repeat themselves, more than half of my user logs are legit the same logs. In addition the miner is legit so silent that it doesn't even activate the CPU nor the GPU on the host machines, it just spawns a whole bunch of CMDs. I can list a ton more of other issues that Future Miner V3 has, but half of the listed functions it claims doesn't even work.

Future Miner V3 Support Team;

The support team is just as useless as the developer. They barely answer you and when they do they give you a response, it doesn't even make sense. Granted Kover did try to help us after we annoyed the hell out of him on telegram. I received better support from a customer who was experiencing the same issues as I was then I did from the Future Miner V3 Support team. Everyone on the Future Miner V3 with the exception of Kover needs to either be fired or retrained because they are legit useless and do not provide real support. The installation documentation of Future Miner V3 is useless and doesn't actually accurately tell you how to correctly install Future Miner V3, so if you never installed a botnet panel before your out of luck buddy because the support team and developer sure as hell aren't helping you. Installation Documents I can tell were rushed and provide little to no information about how to use the product or install it, if the developer and support team doesn't want to be bothered with customer questions and issues then at least create documentation that will answer questions and cover potential issues customers may face.

Overall Future Miner V3 is not worth the price they are trying to sell it for, its at least not worth the price tag in the current state it is in. At most this product is worth \$15-20 dollars and that's me being generous because I have purchased stuff under that price range which was developed better and had a support team that gave a shit. Developer needs to realize that customers and our money is what makes him rich and when you treat us like shit, refuse to help us, answer questions, refuse to fix your product and try to blame the customer for doing something wrong it will never end well. I am sure in the coming weeks more negative reviews will come out regarding Future Miner V3. I was very patient with the developer and his support team but I am not going to sit here and have people be under the impression they are purchasing a premium product when its not. I also noticed some of these positive reviews seem to be newly created accounts so I am not sure if the developer is faking reviews.

UPDATE (12/15/2021);

The developer of Future Miner V3 reached out to me and offered me a full refund. He also mentioned that he will be updating Future Miner V3 and fixing the issues I mentioned in my post. I guess we will truly find out if they are fixed once the update goes live. Future Miner V3 documentation has been updated to now include two tutorial videos on how to correctly setup the panel. [warn]

Scrubspooft - December 15, 2021, 9:46 am

For everyone having issues, I have made two tutorial videos for you, from start to finish, from installing the web server to configuring mysql and panel config properly, to actually testing the payload.

Panel Installation Tutorial Using XAMPP: <https://vimeo.com/657101832>

Builder Tutorial, with Payload Installation/Connection Test: <https://vimeo.com/657102077>

Also, a large number of people are trying to use web hosting for xmrig and lolminer that either are already detected by programs like malwarebytes or straight up are not direct exe download links. You need to host these files yourself on your server, direct exe link, OR do not use remote miner option and have a larger payload. I hope all of this information will clear up issues some users are experiencing.

suduspoon02 - December 15, 2021, 12:33 pm

how long usually for server back online?

+1 its so true its a fully scam in my opinion
Can you link it please because i have not found any miners on github that is golang.

DashyKnight - December 19, 2021, 8:25 am

My review of FutureMiner v3

I'll tell only cons:

- 1) Awfull support, only 1 person helped me;
- 2) Miner process is calc.exe, wtf?
- 3) Direct link to the miner not working;
- 4) Documentation is useless;
- 5) Panel not working too...
- 6) No process info encryption

This is the first thing that immediately came to mind. I expected more, switching back from FutureV3.

But! I hope it will be a little better. [warn]

Scrubspooof - December 20, 2021, 1:39 am

(Dec 20, 2021 02:34 AM)Arf33 Wrote: [\[CITE\]](#) Hi guys,

I bought FutureMiner LifeTime, but what a disappointment...

The miner is using Xmrigr & lolminer. I have configuration who work for this two miners, but of course not working in FutureMiner :)

The support is... not good at all. I can tell the guy on Telegram wanted to help me... but i did all the tests, did all the feedback to him and i got no answers.

A pure disappointment. Don't buy this product !!!

I'll change my review is they are really trying to solve the problem and communicate !!! i would love to have it to work :)

Great, ANOTHER GREAT REVIEW from someone who DOESN'T OWN THE PRODUCT.

Working configs for both xmrigr and lolminer are inside the documentation. Did you use your own, or did you follow our guidelines? Did you set the config in the build AND the panel as the documentation states?

Your post has been reported and you will be exiled from HF for your contribution. Thank you for wasting your time.

(Dec 20, 2021 02:26 AM)Hellmagers Wrote: [\[CITE\]](#) I'm interested in buying, but I am not sure anymore after reading the recent reviews. Not sure if people are too dumb to set up or if the product is unfinished. What's the deal?

I thought I would see what all the complaints were about concerning setting up on a linux VPS.

Just did a test install on Debian 11 with MariaDB/NGINX. Took.. maybe 15 minutes between buying the server to logging into the panel.

Works great.

All these wonderful reviewers truly are too dumb to set it up, and are angry because we won't hold your hand.

If you are testing in a VM, you WILL HAVE PROBLEMS. XMRIG and Lolminer do not run in VM and this will cause the miner to crash and restart over and over.

If you don't know how to set up a server (including installing php modules and installing mariadb/importing sql files/creating databases), install and configure a panel (edit config files), and test the builder (use a proper miner config and don't test in a VM) don't buy our product.

Scrubspooof - December 20, 2021, 2:29 am

(Dec 20, 2021 03:07 AM)Arf33 Wrote: [\[CITE\]](#) Yes i do :)

I bought it with you... And i have proof ! But no contract on HF.

I'll be happy to talk with you about it. I'm just here to give my honnest feedback. And also have an answer.

Trust me, i would love to edit my post to say your product is awesome.

Btw your documentation is just this video : Builder Tutorial, with Payload Installation/Connection Test: <https://vimeo.com/657102077> ??

Or do you have other doc to setup the miner ?

I'll give you a full feedback by pm.

Use Documentation button in the Builder, it will open in your browser.

GSLLL - December 20, 2021, 3:03 am

I have installed the panel on hosting, but
the panel did not open. I contacted support
hosting and they couldn't find the error.

The author had to write in the description that the software is for programmers, but for beginners it is not suitable (Then I would not buy.) Or you need to write detailed instructions for use (as other sellers do).

Scrubspooof - December 20, 2021, 3:07 am

Marisaa? - December 20, 2021, 5:30 am

Does your miner support xmrig on Proxy ??

reich - December 20, 2021, 2:44 pm

Do you sell private crypts for this?

abomouaz - December 20, 2021, 10:20 pm

I have bought FutureMiner and this is my review

- mining doesn't work, I have tried it on 5 client, no one is mining
- Panel not working, it stop spontaneously
- Documentation is useless and no teach you
- the build not FUD, it exposed from windows defender

- Support team is the worst thing, they don't help you in installing the panel, also when I faced him and told him that their miner doesn't work, they started to ignore me, and when I told him to refund me, they banned me to access the builder, I can't access to builder right now, after than I told him to return my account if they don't want to refund me, but no response, so they took the money and banned me.

- I used the UnamSanctam miner, it is a free and better than this shit
- I have bought many thing from HF, all of sellers are a nice people and all of them can refund with me, I don't know why this person don't accept this choice

- also am not the only one who have a problem with him, check the replies there are also people have a problem with him

Scrubspooof - December 20, 2021, 10:34 pm

I don't have a site, I said it to scare you to refund me,
you don't have a right to banned my key
I paid to you, you should never do that

Miraeoss - December 22, 2021, 3:31 am

Contacted you on sellix support few days ago about resetting my hwid as I changed rdp, don't have a contract as I used the autobuy before it was mandatory by you to use the contract, can't pm you here but you should have gotten my support queries from sellix

mysteh741 - December 24, 2021, 8:40 pm

will be buying this in the near future

arrkay1 - December 25, 2021, 6:46 am

looks cool.. want to try it

SIM-5091389 - December 25, 2021, 7:55 am

I purchased it and can't wait to try it out. Once I do get a few bots on it I will leave a review, but so far the purchasing system was really fast and I do applaud Scrubspooft for implementing it.

4chan.org/b/ - December 25, 2021, 8:37 am

(Dec 20, 2021 11:20 PM)abomouaz Wrote: [\[CITE\]](#) I have bought FutureMiner and this is my review

- mining doesn't work, I have tried it on 5 client, no one is mining
- Panel not working, it stop spontaneously
- Documentation is useless and no teach you
- the build not FUD, it exposed from windows defender

- Support team is the worst thing, they don't help you in installing the panel, also when I faced him and told him that their miner doesn't work, they started to ignore me, and when I told him to refund me, they banned me to access the builder, I can't access to builder right now, after than I told him to return my account if they don't want to refund me, but no response, so they took the money and banned me.

- I used the UnamSanctam miner, it is a free and better than this shit
- I have bought many thing from HF, all of sellers are a nice people and all of them can refund with me, I don't know why this person don't accept this choice

- also am not the only one who have a problem with him, check the replys there are also people have a problem with him

Was planning to purchase until i started seeing a few reviews like this, banning users builders for leaving a review is not breaking any of the TOS. Anyhow glws looked like a good product...

after the purchase, I discovered that is amazing service for 6 reasons:

1- mined with cpu and gpu for two different currencies

- 2- proxy feature
- 3- crypted (not fully crypted) but it update fast to be crypted again
- 4- panel, with tasks features so it will be like a small botnet network
- 5- and this the best, the support (very faster for any issues and very collaborator) so is not just selling the service and disappears xD
- 6- the price

Paid : 640892-823b76a*****

I paid for the miner yesterday , the product not working (they told me that there is server problem)
there is no support ,this guys saw my msgs and not answering .. i dont know if its safe to buy i didnt
get my item working yet.

alexbraila90 - February 8, 2022, 2:10 pm

Hello when is this avaiable again ? i want to buy however heard the server is down ?

Deflate - February 8, 2022, 2:12 pm

When will this work again? Also is it FUD or which crypter to use?

NotKover - February 9, 2022, 2:31 am

Soon but currently the devs are having issues and i would find a crypter to use for it

Ayrton Watt - February 11, 2022, 10:08 am

@eliasjorel Do you want buy ransomware ?

@eliasjorel Do you want buy ransomware ?

Message the devs and ask them

SIM-5091389 - February 25, 2022, 9:17 pm

Is that crypter ever coming out?

SIM-5102439 - March 20, 2022, 9:46 am

Looks like this project is dead an burried

Scrubspooof - March 20, 2022, 3:50 pm

The entire project and the HF crew are for sale actually.

Comrade - April 26, 2022, 8:07 am

What about the current customers who brought LIFETIME MEMBERSHIP LICENSE ?
you need to provide support to them.....you cannot just leave them behind.....
when you will sell the project to someone else, the new project owner will provide support....

Enzo - April 26, 2022, 12:51 pm

This project looks like it's worth about 45\$. Ide give you that much for it.
