This is actually quite interesting, I haven't seen something like this being sold.

\$900? Oooooof.

GLwS but in my opinion the price is over retail. But still a very good subreddit and pretty good for ewhore niche.

I can do \$650 if you haven't sold already, this is what it's worth IMO.

I've sold 100's of Subreddits and Reddit accounts.

My dude, you're bumping a thread inactive since 2021 and the OP hasn't been online since last year. Always read threads thoroughly before posting in case you are bumping dead threads.
