i've seen him make quality posts and most of it pretty accurate, it's easy to trash people not so easy to provide value, if i was a betting man i would put some money into what this guy is gonna suggest (after doing a bit of research myself ofcourse) and even then i will DCA into it to minimize further risk, in crypto it's all about risk management, instead of knocking people down , try to use the value others provide for FREE on this forum. the most effortless thing someone can do is be negative and knock someone down for no apparent reason.

that being said OP didn't claim to be a god, he just said that he did extensive research on AXS and

since it did so well he has a similar feeling about his new research. don't like it? don't read it, simple as that lmao why are u so salty

This looks really cool, assuming they actually have the technology. My problem is based on the site, all I see is a lite paper/marketing material. Also, the dev team are not putting their real identities out there and are hiding behind handles.

It's so new though it might be worth throwing \$10-50 into just in case they end up being legit. What they were saying was kind of vague, however I like the idea of having ownership of an NFT that can be used for game engine models and 3d printed models. On the surface, it sounds like a neat idea. I don't know enough about it though.

Still a relatively experimental project, wouldn't throw any big bucks in it, but like you said ~\$50 wouldn't hurt.

Not to be rude here, but do you know how fucking stupid you sound? I'm just gonna address the elephant in the room.

Your reason for not saying the name of the token is because you don't have the exact tokenomics, maybe people in the forum can help you with finding this out?

You aren't obliged to share anything (nor do I care about this token) however if you genuinely wanted to help members on the forum, you'd share the tokens name rather than stringing people along/drip feeding... If you was validating it was a legit project then that's more understandable, but the fact you're waiting to find out the tokenomics baffles me.

Stop being an asshole, it's even more cringe seeing people begging you for the tokens name!

Anyways peace.

Your move :)

\$0.10 per coin
\$18,000,000 market cap
\$30,000,000 fully diluted
Oh thank god, I will outperform this. Hahaha.

Nerd

I honestly don't care about the prediction, I felt to address the elephant in the room to save face for those asking for the tokens name. It's quite embarrassing to see people being strung along and I don't see the point for making this type of thread anyways... "I have a predication but not ready to announce it yet", come on dude.

>make sure they did all the DD they could before suggesting it to a forum.

"All the DD" whilst OP states their only waiting for tokenomics. Seems OP is waiting for the right time to announce, whilst the token may potentially be green and then capitalise when people off the forum add to that pump.

Thanks for the negative reps though lol.

The confidence lol.

Any ETA on when you will be ready?

Joy - November 9, 2021, 11:26 pm

What all exchanges is the coin available on? I just want to be ready with funds when you announce it. ?

Agreed with this. OP seems to have a sick urge for attention every now and then. It's one thing to get people engaged in a real thing and another YT type of bs to engage people for nothing. Do your DD and then post or post it and allow others to do their own DD, at their own risk. But we all know none of those options ARE options for OPs ego.

its not that serious ya'll - sure it was click-bait and boisterous but it's just your typical call/prediction thread but delayed

move on and ignore the thread

popZmoke - November 12, 2021, 4:57 pm

pointless thread lol and youre still not dropping the name so people cant do their own research... why create this in the first place?

Mr Kewl - November 12, 2021, 10:50 pm

People be like why you delayed?

Bruh, I'm not gonna post anything that is most likely gonna get you rugged, I care about your money more than ya'll do.

Why don't you just post it and let us do DD?

Lmao, you can't there is no tokenomics from the team out yet, I literally have way more access to

information from inferring than most people could research.

Also check out my older thread it was dead for 3 months, people only noticed after a huge pump, loooool.

I think only 1-2 people did their own research and bought it.

Whats up mr kewl. Are we gonna get an update.

Hicupish - November 16, 2021, 6:07 pm

Bloke with a big ego. This waiting game is fucking frustrating and ol mate just loves a bit of attention

darkair - November 16, 2021, 6:11 pm

the only thing up 1600% is the amount of time we waited :P jk it doesn't matter, at the end of the day all of this is just fun, take your time

`KSI - November 19, 2021, 1:01 pm
