Thread: [Oldschool Runescape Profitable Bot Farming Setup & Mentoring](#)

Stockholm - November 8, 2021, 8:48 am

Not super familiar with this forum or how things work, so i will keep this short and sweet.

Unfortunately i cannot upload photos unless im upgraded, so if you want any screensharing, proof of my claims or anything well have to take this to private messages or discord.

What I am offering today is, a fully setup and functional bot farm for oldschool runescape. The goal for a bot farm is to run a client with scripts that allow your accounts to farm as much gold as possible, the gold can then be sold for .50 for every 1million gold. This service will be an entire setup for a farm, a very detailed explanation on how to run and operate everything, where to sell your gold, and everything.

There wont be anything else required to purchase additional unless you want to scale your farm, which can be done!

The farm I am setting up for you will consist of 5 accounts running simltaneously and each account with be making 1-2m per session. So, 5-7m per day which accumulates to 3-5\$ a day. Now like i mentioned above this is just small scale and basically a introduction to help you get the ball rolling.

If scaled properly and done correctly a runescape bot farm can be EXTREMELY PROFITABLE

For this full service/setup I am asking \$80, this will include everything you need to start your farm. (accounts, membership, scripts/client)

For any additional details or questions hmu on discord, id gladly discuss anything! ghøst#2552 [contract=tid]Start Contract[/contract]

If you want to do a vouch copy, I would be interested in seeing how it plays out.

I also have some questions, such as:

[1] Are you going to help setup VMs for the bots? if so what type of OS, Ubuntu? also what VM software, like VMWare/Proxmox/Docker?

[2] How do you liquidate the gold? Vouched sellers from HF/Sythe?

[3] Are you using different clients/scripts (per instance)? Injection? Color-based?

Ect...

Stockholm - November 9, 2021, 5:04 pm

Still available to only 3 people

Yes I'll help setup the VM, it's just windows.

Also yes the gold will be sold to either big gold buyers such as rsmalls or private buyers on forums.

As far as clients and scripts I introduce you to public ones/paid ones. But I also introduce you to a private client I've used for a while cause when it comes down to it, your client and scripts are what play a big factor in bans etc.

Does he respond to you after payment?

He always responds right away, but after I've paid, he only sent me 1 message (more than 24 hours after payment), which was "I'm here my bad buddy".

Set up your existing customers farms before trying to lure more people in ... it's been 24 hours since I paid, while you promised delivery would be just 30 minutes.

Good. I was afraid I'd get banned or closed for sales thrashing, but if you're a scammer, you don't deserve any business. <https://hackforums.net/showthread.php?tid=6181255>

Appreciate you posting that here for people to see before they make any decisions. Sad that he didn't even attempt to give you any information at all just literally didn't reply.. staff should be banning this bloke asap, he's probably hoping people unfamiliar with the forums will contact him direct so he can stack up the money before he's sent on his way.

I too am looking for someone legit that can help me set up and get familiar with bot farms, but am starting to think a lot of the people wanting to share their knowledge for a price have flaws in their methods of approach which is why they're putting effort into trying to sell their knowledge for \$50 or whatever.

Vibe - December 30, 2021, 5:42 am

80\$ Include sever or where are bots hosted
