they seem to offer undetected faceit and esea cheats for only 29usd per month also a pretty nice video channel.

I'm sceptical because of the price lmk what yall think.

Just read a quick post on ElitePvpers, the guy updated and said it was a scam.

Said he was banned after the first game, I'd be weary. You know what they say about things that sounds too good to be true.

no, it's not legit.

for esea products visit ekknod.xyz for a reliable & well reviewed provider.

faceit is alot harder to come across nowadays, there are a few providers but I'm afraid they won't sell to people not invited.

all these public sales are just scam. Do not buy it!

It will take some time to be detected. You will get banned after 2 - 4 weeks so yeah.

For Faceit or Vanguard level cheating you really need to be in a private and slotted community, you're just wasting you're time and throwing your account away otherwise.

And where i can find someone to make a bypass for faceit or to invite me for buying?

Looks like a shady ass domain, wouldn't trust personally

DemonAsylum - January 25, 2024, 11:46 am

Legit or not, no one needs this lame shit. Don't be a bitch.

El3tr0Nitr0 - January 27, 2024, 5:10 pm

Don't use cheats just play the damn game!

????0?? ??? - January 27, 2024, 8:20 pm

if you're going to cheat, I suggest just sticking with ghostware and for more advance things to go with a direct memory access card
