Hello,

We have been working on perfecting our platform for years based on input from the community. We have a history dating back to the end of 2018.

Our games are currently disabled until the beta starts tomorrow.

However please review the site in its current form and let me know if you find anything that needs improvement! ?

<https://beta.arena.gg> is the current link

I personally dislike the design of the website, it may be the text used, and everything being so small and inaccessible. Also, the logo needs some work.

I don't mind the theme color, but it does definitely remind me of a Twitch copy in a way - Obviously different though. One thing I think you should consider is spacing some of the text out. Perhaps the middle section could be a parallax or something... It's hard to keep focused because there is a lot of text on the page so close together, in a small font.

Good luck with the project, I will keep my eyes on this. I've loved the idea of a PVP betting site for a while, but haven't really heard of any - I have been out of the gaming world for a while though.

Sorry to bump the thread, but how's the beta going?

Hey np, let me share our latest announcement so you guys are updated as well.

@everyone I'm happy to announce that our official launch date is the 4th of February at 20PM GMT! ? I know you all have been waiting a long time for us to launch but the long wait will have

been worth it. We really resolved alot of issues and polished many things on the website. For example losing money to the fee is resolved by crediting the user his money back if his bet is higher then 95% of the pot on jackpot. Another issue of money being stuck for too long in a coinflip game has also been resolved by setting coinflip games to expire after 30 minutes. This just goes to show we really listen to our community in order to make a social gambling platform that meets your standards and expectations.

We plan to add more games in the future and hope the launch will mark the start of a great journey that you will travel with us. Please help us spread awareness and tell your friends about the launch date and lets get this party started! ? React with ? if you plan to attend our launch!

Hasn't this been around for years? I remember potentially looking at buying/investing in this
