

Forum:[Hack Forums](#)

Thread: [If you want to learn C or C++, read this post before doing anything else](#)

sbrg - August 17, 2010, 2:56 pm

I am sick and tired of people that are simply unable to do any proper research to find a proper source to learn either language from.

Therefore, I have, in a hypothetical adjacent universe, taken these books from my personal ebook collection and uploaded them to stashbox. There are beginner C and C++ books, as well as advanced. Start with beginner, then read advanced. It's not fucking rocket science.

In this aforementioned hypothetical universe where my alternate self committed this act of piracy and uploaded these books, the link was:

Code <http://stashbox.org/978804/nomnom.rar>

And the password for this RAR file was:

Code &a^BMT/N

Clearly, I am a man of much higher standards than my alternate self; stooping to piracy is simply not seeming for a man of my stature.

And for the record; by posting this, I am officially making it legal to stab, shoot and kill anyone and everyone who posts a question about C++ resources without doing research that leads him to this link.

Now, get to reading, you fucking gits.

g4143 - August 17, 2010, 3:34 pm

Hey Sbrg your limited...Is this the effect of your 'hypothetical adjacent universe'?

sbrg - August 17, 2010, 3:36 pm

(Aug 17, 2010 03:34 PM)g4143 Wrote: [\[CITE\]](#) Hey Sbrg your limited...Is this the effect of your 'hypothetical adjacent universe'?

It is indeed. I am trying to get this stickied so that we can stop getting bombarded by "HEY GIEF C++ TUTORIAL LOL!!!" posts, and I'm receiving nothing but shit in return, despite the fact that I am doing something genuinely beneficial for this forum.

Original thread:

<https://hackforums.net/showthread.php?tid=618146>

Followup:

<https://hackforums.net/showthread.php?tid=618169&pid=5876645#pid5876645>

g4143 - August 17, 2010, 3:54 pm

I think the problem steams from HF's adolescent majority and its perception of itself...

Let me clear up a few adolescent truths->misconceptions:

1. Being the top student in your grade 7/8/9 math/science class means nothing. Who cares.
2. Taking a computer course in junior/senior high amounts to nothing...The course is geared to the

lowest common denominator...Probably you.

3. You know nothing.

I could continue this list...ad infinitum

Diabolic - August 17, 2010, 4:17 pm

Erm, Sorry what does this show ?

Apo123 - August 17, 2010, 4:29 pm

(Aug 17, 2010 04:17 PM)Diabolic Wrote: [\[CITE\]](#) Erm, Sorry what does this show ?

Are you too fucking dense to understand? So many illiterate retards create threads in this section asking for C/C++ tutorials, books, etc. We get multiples PER DAY.

It gets tiring saying the EXACT SAME FUCKING THING to imbeciles who are too lazy to SEARCH THE FUCKING FORUMS or USE GOOGLE.

Therefore sbrg's alternate universal self stooped to using piracy and uploading some ebooks to attempt to help solve the problem.

While I agree that this thread should be stickied, the CURRENT sticky doesn't even get looked at by people. The current sticky is also so horribly out of date it's mind-boggling.

I am now making it a personal policy to give -3 reps to people who make those kinds of threads within this section. This will not apply to people who've already put forth some effort (IE people who may have been using a tutorial or book and want further resources for learning). This will apply to "hi i herd C++ is a gud languaeg pls giv me tuts thx". Posts made before this edit will not have this applied, since I'd hit the daily rep limit in a minute or 2.

Cam G - August 17, 2010, 4:47 pm

Good share, but you're not suppose to ask for threads to be stickied. People will keep making threads everywhere around the forums no matter what asking for help even if the answers can easily be searched, welcome to HackForums.

unknown897 - August 17, 2010, 4:53 pm

Now, get to reading, you fucking gits.Well, I turned in a few people. And say thank you to your "alternate self" on my part for the books, I already had K&R, nice to see more advanced books.

sbrg - August 17, 2010, 5:15 pm

(Aug 17, 2010 04:47 PM)Cam G Wrote: [\[CITE\]](#) Good share, but you're not suppose to ask for threads to be stickied. People will keep making threads everywhere around the forums no matter what asking for help even if the answers can easily be searched, welcome to HackForums.

Please leave the programming section to the programming crowd. After all, I leave the lounge to

lounge whores such as yourself.

By the way; are you really that fucking docile that just because there's a written rule somewhere, you will accept it unconditionally? There are rules in countries that say men can beat their wives without repercussion. Would you blindly accept that?

Get the fuck out. If I wanted the opinions of some close-minded, semi-literate, tamed über-puppy, I'd have gone to the lounge or some similar forum.

g4143 - August 17, 2010, 5:21 pm

Sbrg, you'll have to leave a contact address so we can follow your escapades...Just in case.

Okay, well to get back on topic, I'm just saying, a good teacher would want as many people as possible to learn, not tell people to leave this forum and leave it up to him and other already taught programmers. I haven't even seen great examples of what he can do, and seems to be he's butthurt about his thread not getting stickied. I'm still trying to figure out whether he's some old prune like he claims to be (73 years old) or if he's a childish flamer. In any case, have a good day.

First great teachers recognize things like talent and develop it. I wish people would pull their head's out of their ass..not everyone has the ability to program at a high or low level. It takes talent and determination to succeed in this field.

Wanting to be a hacker is not enough...

Cam G - August 17, 2010, 6:05 pm

(Aug 17, 2010 06:03 PM)g4143 Wrote: [\[CITE\]](#) First great teachers recognize things like talent and develop it. I wish people would pull their head's out of their ass..not everyone has the ability to program at a high or low level. It takes talent and determination to succeed in this field.

Only way people are really going to find out whether they have the ability is to try it and see if they do.

Sandurz - August 17, 2010, 6:11 pm

(Aug 17, 2010 05:15 PM)sbrg Wrote: [\[CITE\]](#) are you really that fucking docile that just because there's a written rule somewhere, you will accept it unconditionally? There are rules in countries that say men can beat their wives without repercussion. Would you blindly accept that I agree with you on almost all points but this one. There's a difference between an internet forum where the rules don't really affect (or is it effect? I can never fucking remember <.<) someones standard of living or physical body. I can't punch you through the internet. Other than that, I do agree with you that people should search the forums first, but chances are, they're just some retard looking for a book that they'll probably

1. Not understand
2. Not get around to reading
3. Not be grateful for

Just ignore them, it really doesn't matter one way or another.

Ethereyte - August 17, 2010, 6:45 pm

If you're going to resolve to flaming and cussing around your to-be-the-savior-of-the-section topic will just end up being closed.

Now chill out and cool off.

matt - August 17, 2010, 6:49 pm

To add to this thread, I recommend the VTC C/C++ tutorials if you're a visual learner. They're pretty good imo. They only cover the basics though.

AdrenaL - August 17, 2010, 8:17 pm

(Aug 17, 2010 06:45 PM)Ethereyte Wrote: [\[CITE\]](#) If you're going to resolve to flaming and cussing around your to-be-the-savior-of-the-section topic will just end up being closed.

QFT. It's a public forum, where the public comes to find help. If all you're going to do is complain about people not using search/not having adequate motivation/being too young then go start your own forum and you can moderate it in whichever way you see fit. Stop crying about what other people do on the internet, because no matter how hard you try to be the white knight, your chances of stopping it are zero. Being an a**hole and then saying "read these ebooks that I uploaded because I'm so mad" is a horrible way to help people that are seeking it. Grow up a little and ignore the threads you think are stupid.

unknown897 - August 17, 2010, 8:27 pm

So you are alright with people asking the same retarded questions over and over with no effort put in on their end? Wanting to be a hacker is not enough, people should put some true effort into it.

Live2Code - August 17, 2010, 8:29 pm

Quote:Only way people are really going to find out whether they have the ability is to try it and see if they do.

No one is disagreeing with that, the problem is people are not trying they are posting mindlessly without searching even hackforums let alone Google. If you want to program and make it past the basics you will have to learn to find information for yourself and try to fix problems without other peoples help.

If you ever want a job you can't tell the person in the interview that you need to use the computer(or phone) to Google that question (one sec).

I don't think a sticky will help for there is plenty in the sticky (tho old) that still works and could prevent (insert made up % here) of threads.

Volcomusa - August 17, 2010, 8:36 pm

Eh, nice thread... And sorry bout your limitedness :P It sucks when alternate reality catches up, does it not?

BTW nice vocabulary FTW. If I was ub3r, I would counter F*k rep you for it.

_ryuurei - August 17, 2010, 11:43 pm

sbrg's brilliance shines through in threads like these. I gave him a +rep specifically for everything that has occurred in this thread.

People need to stop being such children, quite whining and holding onto their pathetic "rules against rude behavior" and realize what a dump the C/C++/Obj-C boards (especially) have become.
[edit]

And much more importantly, DO SOMETHING ABOUT IT. Why don't we even have a moderator anyway?

SIM-137033 - August 18, 2010, 12:50 am

Please have my babies sbrg <3

We could just stop replying to the threads, sure the circlejerk that usually ensues is fun but the alternative of just letting them die seems much more tempting to me. Then again most of the people that can barely write a line of code will jump on the topics like vultures anyways to boost their misserable little ego regardless.

_ryuurei - August 29, 2010, 2:33 pm

I completely agree that the threads should just die. As you said, however, they will always be responded to by silly skids that think they're leet because they can make a GUI with Visual Studio. If the threads would just die by themselves, I amongst others would be happy to see that happen, but since it isn't likely this will ever be the case, we should just adapt to humiliating them amongst their like-minded 13 year old peers.

(Sep 10, 2010 11:25 PM)????????? Wrote: [\[CITE\]](#) here you go

http://letitbit.net/download/1525508/9194.96ad166339a52cfba63cf06c5/C__All_In_One_Desk_Reference_For_Dummies.pdf.html

I said C not C++! ?

sbrg - September 11, 2010, 7:52 am

Why do you want that crappy, unknown "desk reference for dummies"? There's a link for ebooks in this very thread, good ones.

obscenelystupid - September 11, 2010, 10:16 am

is it really all that crappy? I just want a C reference book that goes easy on n00b C coders, that's all.

sbrg - September 11, 2010, 10:20 am

Generally, if the book has "dummies" in the title or is telling you to learn the programming language in n arbitrary_time_units then it's shit.

nk5 - September 12, 2010, 7:19 am

so what they are lazy to look up stuff on google that dont give you the right to degrade them if you have the talent to help do so thats why you,re on hackforum.

AdV - September 16, 2010, 5:58 am

Saw someone ask for programming books/tutorials. Clearly this post hasn't been up top enough yet.

tohen - September 17, 2010, 9:02 pm

(Sep 16, 2010 05:58 AM)AdV Wrote: [\[CITE\]](#) Saw someone ask for programming books/tutorials. Clearly this post hasn't been up top enough yet.+1 for an obvious reason to sticky the thread.

OTOH, if the member doesn't have the sense or effort to have a quick look through the first page of threads before creating a new thread on the same old topic, then why should anyone bother replying to their request for books/tutorials. Why bother to help them when they clearly can't help themselves.

Or, OTOH again, sticky the thread with the useful information so it's always at the top and doesn't get missed as easily. That would be the helpful, rational thing to do for a place that's supposed to be helping people.

stdio - September 17, 2010, 10:33 pm

(Sep 17, 2010 09:02 PM)tohen Wrote: [\[CITE\]](#) OTOH, if the member doesn't have the sense or effort to have a quick look through the first page of threads before creating a new thread on the same old topic, then why should anyone bother replying to their request for books/tutorials. Why bother to help them when they clearly can't help themselves.

Its just HF, Ive learned to finally accept that there will be very few threads containing worthy questions, or threads containing information thats useful to learn from.

Here is the front page as I see it and why it blows.

Sticky The Complete C++ Guide.

Its not a complete c++ guide. Quite far from it. Outdated compilers/shitty tutorials and books. Needs major overhaul with updated information.

Normal Threads

WTF?

Shitty title that tells nothing. Question is why c++ for dummies code doesnt compile with no further information. Bad reference / no examples.

[c] GUI Programming

Asking if anyone as information on programming guis in c. Said he youtubed/google. Obviously not hard enough, information is easy to find.

C or C++ (Beginning Language)

Seriously? This question has been asked so many times and the only answer I can give to anyone actually asking this is neither. You will fail at them all.

If you want to learn C or C++...

Content provided in books is useful, should be updated in sticky... along with all the other things that need to be changed there.

Experienced C++ coder needed

5 or so people can fill this role on this site imo. But op provides no information and most arent willing to go that far out of the way or waste their time.

[Share your opinion]Future Programming Goals

No information about c/c++ but an ok general topic discussion every now and again

basic cipher encryption/decryption

Finally some source. Its not the best work and has lots of room for improvement, but we finally get to one post with c++.

Keylogger question

Been asked/answered many times in the past. A simple HF search let alone a google search should have answered this question easily

[VC++]We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.Process ID

Asked/Answered many times already. Waste of thread

[VC++][QUESTION].NET Framework

Pretty obvious question with a bit of knowledge in c/c++.

Weird Problem

Stupid title. Dumb question. No information. Arrogant Op asking for help when information provided is impossible to answer. Go figure the problem had nothing to do with his post. Typical of many that visit this forum.

Im going to stop now as you see where this is going.

< 10% threads contain source

< 10% threads contain useful information to learning c++

~2/3's asking repetitive stupid questions without properly searching or giving enough information to answer them

Either accept it/ignore it/laugh at it but unfortunately it currently seems impossible to change it.

Also +6 or so for the number of good books in the collection.

tehnub - September 18, 2010, 4:57 am

Maybe we need 10 stickies for the same thing, more noticable? Oh wait, people wouldn't bother to check them. Stickies never contain any useful information... Riiight?

Anyway, thanks, I know I won't be the only one you're helping with this post :P

sbrg - September 23, 2010, 11:07 am

Bumping this shit the fuck up because people are still too fucking lazy to search.

(Nov 16, 2010 09:59 PM)Psycho Wrote: [\[CITE\]](#) If this archive includes K&R, how can it be horrible for beginners?

Isn't that obvious? It doesn't include "SUPER COOL AWESOME" videos like anti-rftm so it can't be good!

Learning from a book?! DESPICABLE!

rtpAmp - *November 17, 2010, 4:45 am*

(Nov 16, 2010 07:57 PM)Drkmaster0 Wrote: [\[CITE\]](#) I hope I can remember this for when I get my new computer...I want to learn c++, but this P.O.S. I have right now can't do anything right except browse internet. And even that is just barely. ?

Install Linux. Slow computers are good for programming. They force you to write efficient code. Fast computers breed slow, lazy programmers.

(Nov 16, 2010 09:59 PM)Psycho Wrote: [\[CITE\]](#) If this archive includes K&R, how can it be horrible for beginners?

K&R can be quite rough read for some people. Especially us who aren't native English speakers. However, being patient with it and putting in some effort will really pay itself back.

Psycho - November 17, 2010, 8:34 am

If I have trouble understanding parts of a book, I would probably research the topic elsewhere and try again later. Sadly, not everyone has enough sense to do that.

PrototypeNinja - November 19, 2010, 12:53 pm

Thank you for the guide. ?

atum - November 20, 2010, 6:20 am

dinos19 - November 20, 2010, 10:40 am

good share bro ;) keep it up

Furanku- - November 21, 2010, 7:58 am

Never mind, these ebooks are lacking C. the beginner C Ebook is no more than 300 pages and hastily describes things, on page 12 it already goes on to while loops and what not.. If you're looking for a great C Ebook it's called "Let us C" and definitely takes the time to explain everything in depth.

AdV - November 21, 2010, 10:51 am

(Nov 21, 2010 08:58 AM)TerminalSlayer Wrote: [\[CITE\]](#) Never mind, these ebooks are lacking C. the beginner C Ebook is no more than 300 pages and hastily describes things, on page 12 it already goes on to while loops and what not.. If you're looking for a great C Ebook it's called "Let us C" and definitely takes the time to explain everything in depth.

Judging from your description you're talking about The C Programming language by Brian Kernighan and Dennis Ritchie, also known as K&R or "The C Bible". It is considered THE book to learn C by thousands of professional C programmers. C is a small language, and there really is no reason to write a very big book about it.

http://en.wikipedia.org/wiki/The_C_Programming_Language_%28book%29 Wrote:The C Programming Language (which is sometimes referred to as K&R) is a well-known programming book written by Brian Kernighan and Dennis Ritchie, the latter of whom originally designed and implemented the language (as well as co-designed the Unix operating system with which development of the language was closely intertwined). The book was central to the development and popularization of the C programming language and is still widely read and used today. Because the book was co-authored by the original language designer, and because the first edition of the book served for many years as the de facto standard for the language, the book is regarded by many to be the authoritative reference on C, and has sometime been referred to as the 'Bible of C.'

Imao ?

Thanks for the upload. The site is down right now but I am going to check it out as soon as it's up. There are probably 5 posts a day asking where to start, so if this thread isn't stickied, we'll keep leaving comments to keep it up at the top.

hek4u - July 14, 2011, 11:45 am

I already have some C books for learning. When server works, I'll take thoes too, maybe found useful. Thanks.

ChairmanOfEarth - July 14, 2011, 1:46 pm

What's wrong with just asking for some help? Of course I read books and do research, how else am I suppose to learn? I only ask about things that I am really confused about, and I suppose this is a forum for learning and getting help? If people don't want to help then they don't have reply. Jeez, can't even ask a question with out being bashed on these days.

Verdamic - July 15, 2011, 6:26 am

Thank you for the advice and the share. But, link is broken, I assume. Doesn't seem to work for me. :(

hek4u - July 15, 2011, 9:25 am

Could someone put these books in dropbox or #, or somewhere else? Stashbox dead for sure, it's 3rd day is dead, I think.

Pseudonym - July 18, 2011, 2:39 pm

Pitty this doesn't work anymore, people are asking for books again :/

Forgotten455 - July 12, 2012, 8:27 am

If you want to play that tough and think you know everything you better get the fucking link up again

Ischyros - July 12, 2012, 7:23 pm

welp, nobody is allowed to stab anyone yet... the links DOWN

stdio - July 12, 2012, 8:16 pm

First the post is 2 years old. Second the op hasn't logged in in 9 months. Third resurrect the post 7 months after the last posting.

Though I suppose it is the same inability to find information on ones own that would lead someone to follow up here after the points mentioned above.

Han. - December 28, 2012, 1:38 pm

This must be resurrected.

Please God, save the section.

superman2012 - December 28, 2012, 8:33 pm

Hello creator .

Link is not working

5UD0C - December 28, 2012, 9:55 pm

Can you please update the file transfer site is down. It would be much appropriated.

1much - December 29, 2012, 8:33 am

thanks for this post I know t will be really informative

this is sad aint gonna lie cant someone re-up this link

dark4ever3000 - January 4, 2013, 9:12 am

Hi man, can you upload it to another filehosting service and send it to me by PM. cause the link is off. Thanks bro

vegetajgd - January 28, 2013, 4:43 am

Thanks a lot for this. Have downloaded it now and will studay from it. Thanks a lot again. :))

And i am able to download it. I will upload it to another filehost if you all wish to. :)

wlangkulay - April 15, 2013, 9:30 pm

Thanks for this book have to read this later and i have downloaded it :)

Wodanaz - April 9, 2015, 4:53 am

I cant download the link , i think its broken..
