Thread: [ETH fake metamask scam](#)

aran7576 - November 18, 2021, 8:19 pm

is anyone here knowledgeable with this scam, basically you set up a fake mint site for a random nft, and then you have a fake metamask, that they connect to, basically it asks them to put their seed phrase in and bam, you got their account, also, if they just straight up mint it just gets sent to your wallet but they dont get anything, will pay for someone to set me up [warn]

noname12345 - November 18, 2021, 8:42 pm

why would anyone random mint from a random site that was made? and why would you enter in your seed phrase ?

You're asking someone to set up a website for you that will steal peoples property when they try to mint the NFT?

I can do that, but you need to send me 10ETH as payment first.
