Thread: [help deobfuscate ConfuserEX for a tip](#)

JoseCmanXDII - November 20, 2021, 5:05 pm

the exe i was trying to deobfuscate is packed with Confuser.Core 1.5

i actually successfully completely deobfuscated it (its simple and easy) and all code were visible but i cant launch the application anymore and i dont know how to fix because im not into this

so if u could help with fixing that because i think application got killed after the deobfuscation method

tip in bitcoin any help would be appreciated.
