Thread: [Aiikm dot com is seized](#)

MentorPEN - November 21, 2021, 1:32 am

AIKIM DOT COM IS SEIZED, I GOT NOTIFIED THAT MY DOMAIN IS SEIZED, AND NOW IS FOR SALE FOR 2000+ USD, by someone called (Network Solution) KINDLY DON'T PURCHASE FROM THERE!

I'll get everyone their servers, do not worry, will update the new domain ASAP!

Sorry everyone for being offline!

L1l DuRk - November 21, 2021, 5:50 am

Wish you good luck in resolving this with your host company.

bk randy - November 21, 2021, 9:11 am

Lol! Bro how do you even own a domain and not know what Network Solutions is xD

im dead

Sorry bout your domain, but it doesn't look like it was "seized", it's just redirecting to a website.

If it was seized then there usually would be a big message saying "This domain has been seized" when you go to it...

Monero-chan - November 21, 2021, 1:02 pm

I'm sorry to hear that man, hope you get this resolved soon.

Wafflemonger - November 21, 2021, 1:10 pm

You're selling bulletproof servers with the front-face being owned/hosted by GoDaddy? I know obviously your VPS servers are not by GoDaddy, but I'm pretty sure that runs afoul of their ToS. Probably why, did you receive a termination e-mail? Can you log into your panel?

EDIT: Someone probably reported your services to GoDaddy and they took you down.

7777777 - November 21, 2021, 3:09 pm

Aiiikim no way just heard about this on the bbc (;)

Lrrr - November 21, 2021, 5:27 pm

Imagine using godaddy as a registrar

MavenGradle - November 21, 2021, 5:29 pm

Seized. Nope. Your domain actually expired and was [drop-catched](#) except that your domain expired

back in September. Did someone forgot to renew their DNS? This is a silly mistake to make.

So bulletproof that not even you could extend your DNS record by at least 1 year?

Wafflemonger - November 21, 2021, 9:43 pm

Ah... I didn't even bother checking at all lol. The moment I saw GoDaddy I assumed they just kicked him off. GoDaddy is essentially the Paypal of domains, so naturally I assumed they did this willingly and with full knowledge of what they were doing.

Turns out you're right lol.

ThinWhiteDuke - November 22, 2021, 6:22 am

Reading this thread made me chuckle, Thanks guys ??

MavenGradle - November 22, 2021, 7:48 am

EDIT: Someone probably reported your services to GoDaddy and they took you down.

It was registered as a frontend to my original domain, aiinternet. Su, so kindly knock your self out, Mr geek!

The only reason I got tracked out was because I advertised something which didn't agreed with their terms of services, they decided to seize is for I didn't gave my document for (know your customers) verification, I wouldn't. Accepted BTC but needed to provide verification!

Good luck,
Regards!

I can register a new domain anytime, searching for where to get without verification. . Su domains are okay, . Nz is also okay! I'm doing my research, so kindly hold on!

With best regards!

And about the DNS thing, I can host my own DNS! Named in linux, how come you didn't knew this! Even a newbie knows about this!

ROFL (Rolling Out F####ing Laughing)

Regards!

2xTheTap115 - December 6, 2021, 8:20 am

It is very good that you inform others about it.

I hope you can resolve this situation asap.

All the best to you???

Orb - December 6, 2021, 8:55 am

Hope you can get this resolved as soon as possible. Best of luck OP.

MavenGradle - December 6, 2021, 10:28 am

So you admit that this is a fault of your own making, and that you have essentially fucked your customers over because you are unwilling to provide a DNS registrar like GoDaddy with the required information to legally own a domain because you failed to do any research, or read a terms of service document. Months in advance even.

In addition, you could have had a solution by now, by providing your own DNS that people can use and so that you can use whatever domain you like, or that you could have registered elsewhere but that you are too lazy to actually do this (it takes about 5 minutes to register a domain) and that you have fucked your customers over for the past couple of months now?

Your service is the best! Seriously, what is up with these half-assed and self-implicating business men now-a-days that offer shitty services and think that people are stupid? I mean sure, you have plenty of stupid everywhere but this is on another level.

I quote and simplify for those who don't understand:

"Bulletproof hosting" - Someone who uses GoDaddy without reading the terms of service ??????????.

"Sorry for being offline, I have solutions, but I am too busy watching anime porn" - ?

Who in their right mind would want to do business with you?

ThinWhiteDuke - December 6, 2021, 3:10 pm

Hope you get it sorted OP

Lrrr - December 6, 2021, 5:21 pm

Thanks for the TLDR, my rep will be swift

MentorPEN - March 3, 2022, 1:58 am

FINALLY got the bail... xD cheers russia! XD

Q. So you admit that this is a fault of your own making, and that you have essentially fucked your customers over because you are unwilling to provide a DNS registrar like GoDaddy with the required information to legally own a domain because you failed to do any research, or read a terms of service document. Months in advance even.

=> Yup, the fault is off my own making but I can change the domain and dns anytime. So, it was of one of my options.

Q. In addition, you could have had a solution by now, by providing your own DNS that people can use and so that you can use whatever domain you like, or that you could have registered elsewhere but that you are too lazy to actually do this (it takes about 5 minutes to register a domain) and that you have fucked your customers over for the past couple of months now?

=> I used go daddy to host my payment platform. Nothing else! Panel is hosted at an dns cluster routing to another IP's. But few or around \$200-\$300 worth of payments were routed. That is not a big amount but the domain is now worth \$1800+ so I do not wish to purchase. Refunded at most!

Q. Your service is the best! Seriously, what is up with these half-assed and self-implicating business men now-a-days that offer shitty services and think that people are stupid? I mean sure, you have plenty of stupid everywhere but this is on another level.

=> DNS are hosted at external domains like aiikm.uk aiinternet.su and other dns hosted domains, only payments are off aiikm.com which provides no log hosting.

Q. I quote and simplify for those who don't understand:
"Bulletproof hosting" - Someone who uses GoDaddy without reading the terms of service
?????????.

"Sorry for being offline, I have solutions, but I am too busy watching anime porn" - ?

Who in their right mind would want to do business with you?

=> Providing bulletproof hosting, means, server won't be taken down, and, which was not! Only aiikm.com got taken down, or, suspended!

r3byte - March 3, 2022, 5:59 am

Sorry to hear that! I hope you get it sorted.

I was domain swiped a few years back, awful situation
