I Guarantee WD Bypass Long Time

But We Do Not Offer, Smart Screen or UAC.

hahahaha this is today screenshot because you want to make prove here.... i posted difference conversation up and people can see. you are a scammer :). i never scam you anything you asked me CCs and stuffs to rip me up and asked me about the \$100 for crypter but you claim not to look for money. anyone who will buy from u should know what is waiting for him infront..

I did say that you tried to scam me it's different by the way :) i said people should be carefull about ur products :) because for 2 times i ask u to crypt a file u said yes and after u bring stories to me lool and try to tell me that u will teach me how to make crypter for free LOL for me it's only scammer that will pretend to help you making a crypter but he can't crypt a single file and will ask you for CCs and stuffs. it's scammer reaction.
