Thread: bulk link sending - bypass spam detection ??

Wayn - *November 24, 2021, 2:29 am*

I need to send one link to xxxx.com in bulk
is it possible to force a link into a chat to act as plain text and not as a link that you click and it opens?

Alternatively, is there a possibility to send one link in bulk on one page and not be detected by the site as spam, promotion and the like after several submissions?
