Thread: [\\$KIBA..... Next Dog Moon Coin?](#)

Grim - November 24, 2021, 11:38 am

been doing alot of research on this project the past few days. I think this could be something pretty big. They just got a new dev team and started some serious things in the works. Stuff that stands out the most to me is their tools you get access to once you become a holder. Like this honey pot checker will run a test buy and sell from any contract of your choosing to make sure its legit. Still it could be a rug pull as people like Jake Paul are tweeting about it but i think it has the potential to be the next big Dog meme coin.

Let me know your guys thoughts if any of you have heard about this Coin yet

Was thinking about grabbing a couple of grand worth just for the hell of it but I no clue where to get it.

Can't find it on Binance, PancakeSwap has never worked for me, the exchange built into metamask doesn't find any quotes. Idk anymore

Cooldudex - November 24, 2021, 12:55 pm

What kind of thoughts are you expecting? It's a meme coin. It either moons or goes to zero the same as every other shitcoin lol

Good luck!

gotta use poocoin bro its sick

Omniscient - November 24, 2021, 3:30 pm

I think every person that pumps this crap hurts the market and credibility of crypto. I think every person buying it is either a greedy bastard or an ignorant cunt. I don't care if it moons. I have integrity and won't touch this kind of crap.
