Thread: [What's the best VPN at the moment for RAT'ing](#)

Partycrasher - November 26, 2021, 7:44 am

Hi guys,

I am getting back to all stuff what I've done before.
What would you recomend as a VPN for RATing?

(If you got something which is free but its slow as fugg, then letme know as well)
(I am willing to pay for VPN but its not nessesary if we've got something free as well.. Wanna just comeback to buisness, I've got couple of frustrating clients which have to be shutted down)

Basic requirements for that would be port forwarding and obv. no logs
(I know all of them gots some logs.. but its a different story.. lets say "hardest to get" a logs)

SIM-4910684 - November 26, 2021, 8:25 am

maybe try port forwarding on mullvad vpn they have an onion site as well as a clear web site they don't keep logs either and they are based in Sweden and don't ask for any information either but the downside is they don't accept monero

Hey OP, Please try OSVPN with Free giveaway & test out our DE-02 Germany Server for reting.
We don't keep any logs as well.

yeah I know but the problem is they are doing it with their own ip and and the default port. I wanna do it so no one can trace it back to me. I wanna avoid reverse engineering
