Thread: [What are you buying for cyber Monday or black Friday?](#)

??? - November 27, 2021, 1:15 pm

Was just wondering what you guys plan on coping tomorrow or what did you buy yesterday on Black Friday? Somethings I'm looking to pick up are; White cable extensions for my PC; Two sets of new switches for my keyboard; some Dior perfume for my mom; A few keycap sets;

Things I've bought so far - Custom keyboard, 4 monitors, monitor stand, and a few other things.

I have not bought anything yet, but I am looking around and if I see something interesting, I will definitely snatch it, however..... First when I get paid :D

Was looking for a 70in TV but can't find one within my budget honestly.

Got new perfume, Sauvage by Dior. Smells amazing. I've been browsing other deals but it feels bad buying something I don't really need, I'd rather use the money for something else.

Probably an infrared heater for my garage.

Well during this Black Friday I managed to cop some really nice keyboard parts and computer parts: Monstargears XO K80, KBD8X kit, ID87 crystal kit, some GMK keycaps (blue/red samurai), blue/red samurai coiled cables, holy panda switches, a bunch of artisans and much more stuff to build 2-3 keyboards.

I found a pretty nice deal on Razer Viper Ultimate mouse, 70 euro instead of 130 or something like that, I bought two, even though I already have one :D

For computer parts, I pulled a i9 10900k, 1660 super and mobo for it, in a bundle, at a really really good price.

Right now I am looking forward to get some more keycaps, unfortunately it's hard to find GMKs on/for sale.
