It has two options, [1] to enter token manually to spread a DM message to all friends

[2] two build payload.exe that acts like token grabber and send it back to you via webhook.

Devilz - November 29, 2021, 10:34 pm

Vouch copy available? I would gladly test and provide an honest review

iAdmin - November 30, 2021, 3:04 am

Pretty cool product if I had Discord slaves I'd buy... :(

Devilz - November 30, 2021, 10:45 am

I asked for a copy to vouch for and share my views.

The product is very simple and convenient to use.

All you have to do is write the token id and the message you want to send.

10/10 products an opportunity not to be missed

Basically, I can enter in any Discord, and the bot will start messaging each user in the server right?

Is possible to exclude admins and mods? Thaks.

Option #1 is to enter the token + the message to mass.

Options #2 is to create token stealer payload.exe , delivery via webhook.

Pledger - January 5, 2022, 5:37 pm

looking for this, shooting you a message now

Markzuberg64 - January 5, 2022, 9:46 pm

Hi , can you please PM me

aldrichames - January 6, 2022, 2:39 am

To make sure I understand correctly on how this operates, is that I need:

- 1) Valid Discord Account
- 2) The Discord account from above needs to be invited/joined to Discord servers.

With those two requirements fulfilled, the worm app will start messaging other discord users from the connected servers.

Am I understanding it properly?

PureCoder - January 6, 2022, 11:56 am

New update pushed.

Open DiscordWorm app to automatic download the new update.

[1] Added message multi lines

[2] Showing account details before sending

Is your service still active ?

If yes I'll contact you for more information.

Thanks.

This tool would be more valuable if you could DM targeted discord groups using multiple accounts, threads and proxies.

casperr - July 14, 2022, 6:56 am

hello , looking interesting is it still online ?

Stanley - July 14, 2022, 8:05 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I would want the question answered as to how you can message people in a server. I'm sure most people here don't understand anything about tokens and want a layman answer. I'm interested in buying. Thanks.
