Thread: [I'm looking for a coder \[HTML/CSS/JS/PHP\]](#)

iAdmin - November 30, 2021, 7:31 am

Please let me know if you are available with some time to basically create a DPD scam page for security research.

Idea of attack:

Victim receives email (I need you to do a HTML template for email too)

Email from DPD reads: You have missed your parcel! Re-arrange a delivery.

Page must record the details the user inputs into the page.

Please let me know if you are available to do this. Looking for someone who knows what they're doing and can do it nicely.

You will be copying the default page/theme from dpd.co.uk

I will be paying in BTC. Looking for a long term friend/partner also.

Thanks! ?
