Laurent Crypt is a free, service for easily protecting your application. Simply PM Me And Send Me Your Application, Or You Can Contact Me, We Offer Unlimited Crypts, Feel Free To Message U.S Supports And Works On All Windows Versions, Fast And Stable.

Supports x86/x64 Bit Files

Supports Any .NET/Native File

Features :

Hide File, Startup, Binder, Icon, Fake Digital Signature, You Can Ask For More Features If You Want.

Runtime :

It Depends On Your File You Want To Encrypt, Example I'm Able To Bypass ESET Smart Security Premium With DCRAT, it is free on Github btw.

What About Windows Defender?

i know it is common antivirus, as i said depends on your file, with my application works well on WD [ Long Time ]

If You Are Spreading, Do Not Expect Long Time Runtime On WD, But At Any Situation i will re-crypt and it will bypass again.

All Crypted Files Will Be With Different Method, And Different Algorithm, So Expect Long Runtime.
