Thread: [Private crypter/ Private stub code](#)

LeadPal - December 2, 2021, 11:21 am

Hello HF

I am tired of getting scammed by these gurantee FUD crypters that just does not work, if anyone got crypter knowlegde and would create me a private stub that actually works that would be fantastic, I would easily pay \$200+ for one.

if you are interested kindly send me a chat.

I will not deal with low populated users or users with open disputes, I been scammed enough on here.

well , i am not old member here i know but i am sure that 95% from .NET / C# wont help you at all

and almost all crypters here is like that , look i can provide you with real native language crypter and there is no payments before i crypt your exe to test it.
