Thread: [Disable Windows Defender On School Laptop?](#)

tom1kHF - December 2, 2021, 4:24 pm

Hello, i am trying to disable a windows defender on a school laptop, i cannot open cmd/powershell/msconfig basically nothing.. i watched some videos but didn't help

Vypez. - December 15, 2021, 11:06 pm

You will need to achieve admin privileges first. Probably from your teachers pc

000_Syth - December 22, 2021, 12:23 am

Search for windows 10 privilege escalation

SIM-4932765 - December 31, 2021, 11:59 pm

Only way I see is by running a malware with "UAC bypass" in order to bypass the fact that you don't have admin privileges. The malware also needs to have a windows defender killer.

Check out <https://github.com/rootm0s/WinPwnage>, it can help you with the UAC bypass part.

UAC bypasses don't actually bypass if there is a password restriction on running things with administrator privileges. All the UAC bypass does is bypass the visible part of running something as administrator, it removes the prompt and the need to click "Yes" on the prompt.
