Thread: [BOTSHOP - UNIQUE CUSTOM GEO TARGETING - MIX NOW EXCLUDE IN,ID,PK,BR,EG - ONLY HERE](#)

Perplex - December 3, 2021, 11:01 am

NEW TRAFFIC STREAM.

Now our worldwide mix exclude india,pakistan,indonesia,brazil, egypt.

New price 0.13\$ per mix load, minimum order 500 for 65\$, now just even better

5k 575\$

10k = 1100\$

This mix is exclusive to my shop. The biggest country is often USA, but depends on time of day too, alot of france, spain, germany . Not 70% asian and africa shit like most sell here.

And if you have specific request for other countries to exclude, we can arrange that too.

As the only provider of loads here we are now able to get target ANY country on earth. We are also able to mix traffic like you want it. with a combination of exactly the countries you want. Do you want a mix of el salvador, poland and and uruguay? I got you. Do you want pure top EU countries? I got you. How about a mix of all tier 1 countries? No limit in how i can target the traffic. Only small countries are naturally slower to receive then big.

This gives you a unique possibility to create exactly the mix you want, and work out a very favorable price with me while you do it aswell.

All bulk deals will be discussed in private, i promise you a favorable deal, and the best geo targeting available here.

Rate is currently 1.2\$ per tier 1 bot, for small orders. you can mix these countries as you want, but i cannot guarantee how many of each you will get, it depends on time of day, countries you choose to mix, and so on.

Minimum order size always 60\$. You can buy 500 mix, or 50 tier one, up to you.

Massive bulk savings available on geo targets.

Rules

1. No ransomware
2. You pay for loads, not active connection
3. After i load youre file, order is done, test it first, not my problem if you send me a broken file
4. No files with more then 5 scantime detection please
5. All sales are final.

Joseph Ducreux - January 26, 2022, 6:02 am

your botnet is going to be destroyed by this marketing technique

and from a client perspective this is a disaster why would you want to have your exe piggybacking off others. in a multi-contested enviroment with other peoples exe's.... its not smart. if one person gets popped alot of others can get popped from a security perspective... all it takes is one of your clients C2 to get sql-injected or ISP'd and than everybody else is at risk.... many modern bots these days have botkillers. many hook browsers. having multiple bots competing for hooks is gonna be very inefficient. having 1 bot on a machine is fine, 2 maybe.. but having like 6x or 10x bots/rats at sametime like the whole panama papers company fonseca has got to compeltely ruin the performance and point of even having a client-infected in the first place

I can see some dumb people putting crypto-miners on the machines, or using them to boot/ddos and others loading them with infostealers it is gonna be dragging these machines to their knees with constant 90% cpu usage lol

I am not trying to knock your hussle I think its cool your making money off it but the actual intrinistics of it. I dont think is smart and I think you can make money better doing it differently

Ohh but i do not need a botnet to do this. There is no possible way something that doesent exist can fail. I do not install customers files on machines that i control aswell, that makes 0 sense. I will not go into details about the intricate details of my operation, but i thank you for the concern.

You should look at what i do more like how a crypter/dropper functions.

From a client perspective it is far from a disaster, do you perhaps notice my 0 unhappy customers?

Thank you for the interest

/e

it is amazing how much you can see with no actual insight. What on earth makes you think that i sell the same bots 10 times? Nothing you say makes plausible sense, its all a guess dragged out from someone who never even dealt with me or know what i do. At first i was fine with this, but now you dare question my product without a clue about what i do.

If you just knew bro ^^

You can call yourself what you want, that does not change the fact that you are trashing my sales without a spec of valid info.

You falsely assume that i am some pleb with smoke loader, or whatever, executing my customers file on my own botnet over and over... i mean srsly bro. This is a fucking insult of extreme proportions both profesionally and personally.

It is practically the definetion of sales trashing. If you had atleast tested my service prior to insulting it. That would have given you a grain of validity, but probably also shut you up

It can work well with organic gamer traffic tho. Some that you get a hold on yourself, through any method. Not bots that come from shops.

Tbh its very rare to find bots with high gpu and high idle time with system turned on. This is what you need for good success.

Not trynna persuade you from using my shop, but tbh if you deploy a miner only, it will not be a big succes.

If its truly runtime undetected, execution rate will be high, cant give a number tho, as it depends on your file.

70-90% would be my guess, if the file is actually undetected. Do test it on vms tho, or atleast dyncheck with internet ON. Rest will not be worth much in a real scenario

Quality of mix still remains lightyears better here, then anywhere else.

Not 70% asia africa and brazil from me. you get alot of Commonwealth + EU countries here.

simply speaking, im way cheaper then the rest. Who the fuck needs 50% of there traffic in useless countries - not me for sure.

Perplex is reselling installs from russian guy "superstar75737" - he is running automated botshop on telegram.

I paid Perplex for 500 loads. One day later he proceed with my order:

He sent me link to task stats and i noticed straightaway the domain name -

Take a look at link to stats i got from superstar75737 automated botshop -

I know the domain stats404.info belongs to superstar75737 because i used his automated botshop many times

I asked Perplex how is that possible and he proceed with excuses because he thought I was stupid -

Facts:

- my file has been executed with superstar75737 smoke botnet panel
- Perplex sent me the stats link to smoke botnet panel which belongs to superstar75737 - you can see the domain name is the same
- no difference in bots - same geo location, many other malware on each bot
- Perplex claims to sell loads but he is reselling installs just like everyone on this forum

Conclusion:

- Perplex used my file in superstar75737 automated botshop

Now this is fun how many excuses and bullshit he wrote. There is no doubt i caught Perplex reselling installs, but he still claims he is not and even started insulting me:

Now this is fun how many excuses and bullshit he wrote. There is no doubt i caught Perplex reselling installs. But he still claims he didnt do that:

I have clearly encouraged you, and anyone else reading this to go to Superstars botshop, make an order and compare the traffic to mine.

Again and again you refuse to do this simple task, that would once and for all verify all that you claim to be so, if it was so. Maybe because you already know what the outcome of that would be, after i just delivered you 750 loads with a mix far far superior to what you will receive in superstars tier 3 shop. And based on your own words you have used hes shop a lot, so you are well aware of the massive problems with hes mix.

I spend a great deal of time telling you about how this work, as well as pointing out to you that superstar is also a reseller from bigger exchanges, and that the mix he sell, and the mix i sell are nothing alike. You blatantly refuse to verify a single of your claims, as they are both uneducated and pulled directly out of your ass. The only basis you have for this is a domain name. Which is neither mine nor superstars - as i have already told you as well. You only see 1 dimension of this, the sales front, but you fail to realize what lies beneath.

Again and again do i encourage you to go put in an order at superstar, or direct resellers of hes(non mentioned, non forgotten), and verify for yourself that the traffic mix will be absurdly bad.

Yet you refuse. Even admitting that you do not care if my traffic is better?

But you see, i do care! And so do my customers! I have nothing to fear from you posting this publicly, as i also told you - because everything i say is very easily verifiable by anyone placing orders at superstar..

Have i ever claimed that my traffic is not bought somewhere else? No, neither publicly or privately. I openly admit to using ppi traffic, i do not base my business on lies and deceit.

Have i ever claimed that my traffic is organic and comes from traffic i generate entirely myself? No, neither publicly or Privately, again i openly admit to use traffic from exchanges, i do not have to base my business on lies and deceit.

Have i ever claimed that what you receive in my mix is superior to what you receive in Superstars shop, as well as any that resells directly from it? Yes, and it also is so, which is easily verifiable by anyone who have used both.

Superstars traffic is filled with india, indonesia, pakistan, egypt, brazil and much more that no one wants. There is a reason that it is so cheap. When you buy at me you will receive not even 1 bot from india, brazil, egypt, pakistan, indonesia. These 5 countries alone make up at-least 50% of the traffic in Superstars telegram bot. Sometimes as much as 70% even

This fact alone is really all i will spend my time on pointing out, as i have already done again and again to you in private. Yet you keep assuming that it is the same. I do not work with assumptions, but with cold hard facts and easily verifiable claims.

I wonder how something can be the same if it is different? I wonder how i can beat superstars prices for geo targeting by 50%, if i am a direct reseller from hes bot? That is not how reselling works bro. Do you see the actual resellers prices? Coincidentally enough, they all sell at higher prices then he do, not lower like i do.

No matter what you say, think or do - facts will remain the same. I do not deceive my customers. I provider them with a mix well worth the price, and far far superior to that of superstars tier 3 focused telegram bot.

My mix is both different and way way better. And i strongly encourage, like i have done with you multiple times in private, anyone to go verify this for themselves. You will be absolutely flooded with countries that i do not even sell a single load from. But yet i sell hes traffic? Common bro... At least try to make sense of yourself

The whole idea of claiming i resell something, that my alleged "source" can not provide goes against every bit of logic that exist. And again, i strongly encourage anyone to test this for themselves.

Actually you have only done be a favor, by forcing me to point out the obvious differences in what i deliver, and what the resellers of him deliver here.

I haven't even bothered to read the screens you send, but i wonder if you post the part where you claim other sellers asked you not to use contracts? That is not how we do it here. Again, this does not hurt me the slightest, my path is clear and honest, but maybe your friends wont be so happy? Its a ban-able offense to encourage customers not to use contract, as it seems, by your own words, both of them have done to you.

/edit, i see you conveniently left that part out. Dont worry i will help you with it :)

Spoiler ([Click to View](#))

Nuff said. I will not entertain you with 1 more word. I have done all in my power to try get you to verify your claims, yet you will not do so - to me the reason for that is simple, you already know i am right. I have given you all the cards, told you exactly what you should do, if you wanted to verify your claims, encouraged you to take it public and everything else i can to make you try back up your claims. Yet you refuse.

That alone says it all to me - and i know for a fact that it will for anyone else reading this too.

Any potential buyers of mine are welcome to contact me, for a link to superstars bot. Make order of some at him, and i will give you some of mine for free. You will immediately see the difference.

What i have said remains nothing but the truth, and i both can and will verify that for anyone who are in doubt. Entirely free.

Now go back to whatever hole you came from.

Making an order of 750 at superstar, you will receive atleast 300 from those 5 countries alone, probably 4-500 too.

That is what i claim, and that is what i deliver.

That is just how it is my man. You can make a scene all you want.

I still encourage anyone to go to superstars shop, make an order, see for yourself how much traffic you get from those countries, and then come to me.

I will then provide anyone with a free bunch of loads, that does not include any of these 5 countries. If that is not different what is? :D

i have recieved 3rd world countries from you, each bot has at least 50 other malware already installed, this is from you.

+ literally just confirmed everything with superstar.

TL DR:

Perplex is reselling from superstar automated botshop. The proofs are undeniable:

I never denied that there would be 3rd world countries too, ofcourse there is third world countries in cheap worldmix.

I simply sell less of them then the rest do, because i do not sell the 5 biggest third world countries, as everyone else do.

This leaves alot of room for better countries in my shop. I know for a fact that you received 7% USA alone in the 750 mix i delivered you.

7% turkey

5% france

4% germany

2% spain

Thats 25% of the traffic right there, all in good countries. I wont waste my time listing the rest, you get the point.

You received a total of 104 different countries, so yes, of course there is 3rd world as well, it is world mix... But my stats for good countries are well higher then anyone else. That is just facts.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

NEW TRAFFIC STREAM.

Now our worldwide mix exclude india,pakistan,indonesia,brazil, egypt.
New price 0.13\$ per mix load, minimum order 500 for 65\$, now just even better
5k 575\$
10k = 1100\$

This mix is exclusive to my shop. The biggest country is often USA, but depends on time of day too, alot of france, spain, germany . Not 70% asian and africa shit like most sell here.
And if you have specific request for other countries to exclude, we can arrange that too.

As the only provider of loads here we are now able to get target ANY country on earth. We are also able to mix traffic like you want it. with a combination of exactly the countries you want. Do you want a mix of el salvador, poland and and uruguay? I got you. Do you want pure top EU countries? I got you. How about a mix of all tier 1 countries? No limit in how i can target the traffic. Only small countries are naturally slower to receive then big.

This gives you a unique possibility to create exactly the mix you want, and work out a very favorable price with me while you do it aswell.
All bulk deals will be discussed in private, i promise you a favorable deal, and the best geo targeting available here.

Rate is currently 1.2\$ per tier 1 bot, for small orders. you can mix these countries as you want, but i cannot guarantee how many of each you will get, it depends on time of day, countries you choose to mix, and so on.
Minimum order size always 60\$. You can buy 500 mix, or 50 tier one, up to you.

Massive bulk savings available on geo targets.

Rules

1. No ransomware
2. You pay for loads, not active connection
3. After i load youre file, order is done, test it first, not my problem if you send me a broken file
4. No files with more then 5 scantime detection please
5. All sales are final.

Send you my tg.

Not really doing this service for small orders anymore, but for bulk deals we can talk.

I can also teach you how to source it directly yourself for a 1 time fee, if you are serious about buying decent quantities of t1, that will pay off very quickly.

AND no, not talking about buying from some other botshop like superstar or another crappy flooded one.

Attityder - June 9, 2022, 2:10 pm

My payload is 980mb big?

Is this possible to load it at your bots?

Would buy large amounts from T1 Countrys.

Message me your telegram uin when it is okay with the payload.

I can recommend you a way to deliver the file, while maintaining its size.

But i cannot load this file alone, you will need to deliver it with a dropper or something similiar - and take the risk of loss yourself.
