Thread: [Free VPS :: 4 CPU - 24GB RAM](#)

Stumail - December 4, 2021, 7:50 pm

I stumbled upon the following video on YouTube, and thought I'd share it with everyone.

Quote:Commands used are here: <https://ideaspot.com.au/blog/oracle-f...>

0:00 Introduction & Sign Up
1:09 Setup Free VPS
2:05 SSH key setup
3:37 Connect with SSH
3:51 Setup VPS and
4:15 Point DNS for Domain
5:22 Install Apanel
8:06 Add website, install WordPress
11:36 Apanel custom panel domain and SSL
14:35 Add firewall
15:11 Testing and conclusions

~

Thanks for your shares. It is big RAM, how is your review about it?

SIM-2502833 - December 9, 2021, 10:14 pm

Someone online linked this to me recently, it seems legitimate so far as I can tell.

Apparently, port 25 is blocked for the Free tier.

no SMTP... which is understandable due to abuse if to fall in the wrong hands.

Object and Archive Storage

If your Free Trial has expired and your account is in an Always Free only state, Always Free includes the following: 20 GB of combined Standard tier, Infrequent Access tier, and Archive tier data. 50,000 Object Storage API requests per month.
