Have always liked Tezos. Think it's a solid project that continues to improve. When it dropped to under \$4.00 last week I bought a lot more, along with BTC it was my dip buy. This news has been great.

I have never bought Tezos but it must be strong if Ubisoft chose to use it.. huge news!! The NFT gaming sector is going to blow up even faster now!! EA Sports might be next..

Not sure why I never looked in Tezos in all the time I have been in crypto.. never been on my radar. Not sure why Ubisoft chose them? There are many POS options atm and Tezos does not stand out to me?

Tezos is one of those slow but steady plays. Good luck to everyone that accumulated more.

I never heard about this coin but I pretty much love Ubisoft and if they decide to create some kind of a game together, I'm pretty sure it will be a good one. Thank you very much for sharing this coin with us and good luck !

They are just experimenting

Ubisoft has also previously built blockchain games on ethereum before

I'd take a good look at UOS instead.

Could you point me in the right direction for ubisoft using Ethereum? Ethereum is not a good option due to network fees.. but if they used a L2 solution but stuck to ERC20 - that would be great!

its a old thread.

but im here just to get informed. Any other one using Tezos ?

Tezos is now partner with big Brands like Manchester United, McLaren , Ubisoft . and they NFT's are so good.

main NFT market place in tezos is objkt. but there arent many tools around to use .
