Thread: [H: 10.000 \\$ Saitama - W: 9000\\$ ETH - Lower amounts available](#)

Hei?eke? - December 9, 2021, 8:21 am

Have 10.000 USD in Saitama
Want 9000 USD in ETH.

Can do 500 \$ increments and above.
Both parties cover their own fee.

You send it to me, or a trusted MM
you cover the fee for sending + MM if using that.
I send you back 10% extra in Saitama

HypeGuy - December 9, 2021, 9:47 am

What is the process of cashing out the Saitama ? I might be interested in doing that for you with a MM.

makes no sense for him to sell it here vs on a dex

its either dirty or fees are extremely high

I don't trust stuff to connect to my wallet, so rather trade with people. then the people who trust those exchanges make some dollars too :)

(Dec 9, 2021 10:47 AM)HypeGuy Wrote: [\[CITE\]](#) What is the process of cashing out the Saitama ? I might be interested in doing that for you with a MM.

Can be exchanged on uniswap and etc, but I don't like to connect my wallet places. So rather pay some extra for a decent exchange with people.

If you do not want to connect to legit DEX like uniswap, then where have you bought them ?
Sounds fishy

Hope they are not coming from the wallets linked to bitmart hack !

No idea what the bitmart hack is, I traded those a very long time ago, not on HF.

If you feel it's sketchy you should stay away from crypto in general.

yes,sketchy when you don't want to use a decentralized platform with hundreds of thousands users with millions of txns

Sketchy, when someone can do for \$100 ,wants to spend \$1,000

Not sketchy when someone points out for not doing so !

Sketchy, when I see your past threads

<https://hackforums.net/showthread.php?tid=6181363>

<https://hackforums.net/showthread.php?tid=6182790>

<https://hackforums.net/showthread.php?tid=6179254>

For me it clearly looks like scammers who phish noobs by pretending as support on TG groups and convince them to click links or give away the keys/seed

Good Luck !

all good deeds to you, but I am not a scammer :)

The BnB I found out I could swap in my trust wallet in seconds. So that solved it quickly.

That didn't work on my iOS device for pancakswap on Saitama, there is no access to that browser thing inside the wallet, which made me lose 1500 USD to trade Saitama straight before I made this thread. That makes me not trust those exchanges.

Losing money is no fun for anyone.

Edit:

Trade done off-site, thanks everyone for the "responses" :)

OKAY

So where and when have you bought /exchanged saitama ?

Imfao you dont trust uniswap?

yeah this shit def a scam

28.10.21 during a trade, I sell credits to a system on my website, and one of my resellers paid me in saitama. :)

Uniswap doesn't work on iOS, yeah trust is a bad choice of wording.

But I need to have access to "accept" that popup when exchanging, I saw it on android, but iOS can't access the browser part inside trustwallet for example anymore to verify the transaction, which made me lose the money.

If I had android in the house I could use that without an issue most likely.

PM me your wallet address

I will check and buy all your saitama

No worries just traded it all away.

Stated above :)

I love how you small FBI agents run around thinking you're the shit around here with zero money in your pockets :)
