Selling my yahoo availability checker, how this works is you load usernames in select threads and start it will then save in a list all available to create usernames. OG's semis ect.

this tool does NOT require proxies at all AOL checker coming soon also

selling this for 2\$ accepting btc/alt coin/venmo/cashapp or 1k bytes

a silly[stupid] question:-

"selling this for 2\$ accepting btc/alt coin/venmo/cashapp or 100k bytes"

how to send 2 usd thru BTC, isn't the fee is higher than this transferred amount

many thanks

i actually didnt mean to put 100k bytes lol

i changed it to 1k bytes and as far as fees go i dont know about btc i use coinbase and sent to email is fee free

at same time i dont know about alt coins but i do sell this for 1k bytes also
