Needs to be able to consistently check trending videos and comment on them

Needs to copy and paste a recent comment from the video as well

Needs to have word filter (so it doesn't comment racist shit etc)

Can be made in Google Api

more details can be shared further in private messages

have had problems with devs in the past, unless you are a trusted dev i will be paying after the program is made

can pay in any method you want

contact in sig

[contract=tid]Start Contract[/contract]

Commenting while using youtube api will lead to all comments and accounts being ghosted. I can create this for you. Let me know what is your main idea via pm, lots of experience behind me
