Thread: [Tutorial\ How To Remove Conficker \(A-C\) /Tutorial \(The Easy Way\)](#)

SecretProxy - March 29, 2009, 3:03 pm

Are you wondering if you have Conflicker C? Do you know you have it and want to remove it? If so, I highly recommend going to :

www.enigmasoftware.com

Go to the bottom of the website. You will then see the link to a program that can detect/and remove any type of conflicker worm.(A-C)

Note: The Program says you will have to reboot your computer for every step of removal if you are found to have it.

Note: If you scan your computer for Conflicker C, and it says you don't have it, that doesn't mean you can't get it. Conflicker A scans vulnerable computers 24/7 and infects them. Conflicker C probably does the same, so you may be able to get it any time.

Note: Thanks Vaqxine for telling me about the program. I just wanted to share this with everyone.

Buy, although it's not a first such thread made on this forum, it is a tutorial meant to save a lot of souls (err, computers).

So the site is down or I'm down not exactly sure ... but when I do go to the site I get an error "connection reset while trying to connect"

I figure I should go ahead and run the test to be sure but can't get to the site so, any one have a zip of the program I may download???
