Thread: [\[BRAND NAME REMOVED\] new ghosting method?](#)

hakup - December 14, 2021, 4:29 am

Hey guys, when I am botting on [BRAND NAME REMOVED] my Accounts are getting initial ghosts after a few minutes being created. So they don't start with 0 Likes right away, but are getting ghosted before hitting the 99 Likes most of the time. All Accounts have no Bio.

Anyone had this before and could fix it?

Probably your proxy you botting with having to be checked and the device as well.

This requires skill. Nothing to do with your device agent
