Thread: [Crypto Trade Setups | 220%+ Profits BTC Trades | Weekly Vouches + Refund | Legendary](#)

Professional27 - December 16, 2021, 9:41 am

I am selling full trade setups for Crypto Currencies such as Bitcoin, Ethereum, Etc...

Set up includes: Entry Point

Stop Loss Point

Take Profit Point

Live Chart Analysis

About me: 15 Years of Internet Marketing experience in all 3 fields. 5 years of trading experience, 3 years of Leverage Trading experience.

This sales thread is only for short scalp trades on the BTC/USD pair. I chose this type of trade because of the high win/loss ratio compared to all other types of long trades. There are many pros and cons to each type of trade. Quick Scalps have fewer fees associated with the trade, less time in the market = less risk. In general, a scalp trade can last anywhere between 1 - 60 minutes.

I chose to trade Bitcoin because it is like a living, breathing, digital global asset. The high volatility of it on the short time frames creates massive opportunities for quick leveraged scalp trades. Below are some screenshots of successful trades and failed trades. I keep the losses to a minimum even if it means getting faked out, I live to trade another hour or two later. We don't get Rekt around here. No need to entertain that risk when all the tools you need to succeed are given to you. I help you learn how to use those tools efficiently.

Pricing and Weekly Vouches

Single BTC/USD Trade Set up: \$15 Paid in BTC/Cashapp

Single Altcoin Of Your Choice Trade Set up: \$25 BTC/Cashapp

2/2 Vouches available at the start of this thread. 2 Vouches will be given out to random thread participants at the start of every week.

Contracts must be used for all transactions including Vouches.

How it works: Within 24 hours you will receive a PM with a link to your package including the details of your specific trade setup with a Live Chart that you can follow if needed. You also get access to my discord server. How long it takes will vary, trade setups can take some time to develop, and oftentimes they are just a micropattern within a larger macro pattern.

Please Read ToSSpoiler ([Click to View](#))*Price may change. Service may be updated with additional bonus content and paid content.

If you don't receive a Trade Setup within 24 hours, you can request a refund or extend it for another 24 hours.

*Terms may change in the future without notice. Please check back often if you are a frequent visitor.

hey man, i am only interested in doing Binance Futures trades with leverage, on 5 Minute chart, to gain quick high profit as long as the buy or sell trade is accurate enough....

so your trade setups are all about this? what leverage you recommend for Futures for your setups?

can we do with 80% or 90% leverage and get out quickly if your your trade setup is fairly accurate?

what i mean is a trade setup like this where the price doesnt retreat, then we can use max or near max leverage for a quick profit

Thanks

This is precisely what I am selling but I would not recommend using that much leverage. 40x leverage would be the extreme maximum I would allow under my terms but obviously, that decision would be yours final. Yes, I have used 70,80, and even 100x leverage in the past with success but you won't survive long using that type of leverage as all it takes is one or two losses to get rekt. If you're planning on it being a one-time thing and the trade is a success, you'll do it again and eventually get rekt. Using my parameters you at least have a strong chance of accumulating Bitcoin long-term. Also, I am using the Phemex platform to trade. It would be better for us to be on the same page so to speak.

I may do a group vouch type of thing for this thread. I've responded to all other vouch requests. I am working on a way to streamline the setup process, that way the time difference between all clients won't be a problem. I'll update this thread soon, for now, I am still accepting more vouch requests.

Minimum Balance of \$100 for Vouch Copies

Yeah but if your signals are accurate enough, you can get heaps of profit with 90x leverage. correct? How much profit you made when you used 90x leverage last time on a single trade?

Can you show backtested results of the strategy on tradingview in the past 3-4 months?

Deep Impact - December 26, 2021, 9:24 pm

The seller is not responsive.....

Nick Elite - March 22, 2022, 11:19 am

Can you setup cryptohopper ? And manage it I'll put in \$10,000 to start and can put 100s more or if there is a better way I just don't want losses

Praetorian92 - March 22, 2022, 1:06 pm

I have the capital to start how much do you charge for this?

usergold1100 - March 28, 2022, 10:56 am

OP please share your telegram or discord

I am in the process of finding a suitable person to handle the support requests from this thread. Unfortunately, I underestimated the amount of interest this would bring from newcomers into the crypto trading space specifically. For the moment, all sales are still on hold. If you have experience with trading platforms like Phemex and would like to help me out with this thread, feel free to pm me and we can discuss.

I'd be interested in seeing this aswell.

I've been trading cryptos for a couple of years now, both spot swing trades and investing in long term bags.

After making very good profits from that I started trading futures about 2 years ago with decent profits.

If you find me fitting for a vouch copy, I'd love to get one. HMU. :)
