Thread: [\[Christmas Sale!!\]Tool Pack | Email Spammer | Leecher | Crackers + Tutorials & More](#)

ednasour - December 16, 2021, 9:10 am

Within this download you will obtain the following tools:

- Crackers: Targeting specific accounts such as Netflix and Spotify (Very good tools work great!!)
- Leechers: F*** Slayer leecher, I got a NEW one for you guys!! (Unreleased Untouched by public..First time selling it!! AKA:Leaked)
- Email Spammer: Spam up emails, Directly to inbox (This is illegal, so use it for educational purposes)
- Youtube view bot: Working as of 12/16/21 (Added a limiter of 500 views per day so you wont get banned. Think smart dont get greedy.)
- DDOS Tools: All the tools you'll ever need !!
- Bulk Email Sender!!!

First Person to post will get it for free!!

I will only be selling 6 of these !! Only 6. (After that your only hope of getting these tools, is if one of the 6 people leak it.)

First 3 buyers = Half off !! (\$10)

Last 3 buyers = Full price (\$20)

(Full price is still a christmas sale, and half price is ultra sale for the first 3 buyers)

Giveaway Winner: Undecided or read post below !!!

your request has been made. I also ask that you please leave a review here after getting testing out the software.

Review The good The Badr:

Good:

Out of the 29 tools, I found that 23 of them were highly unique! The YouTube viewer is legitimate! Its pretty dope actually. The views are spread out so that they seem real. I tested it for 100 views on some random low view YouTube video and it worked. The views just took awhile to populate. As for the crackers I found it nicely made. The layouts are nice and easy to use. A retarded person could use it.

Overall good impression.

Bad:

The remaining 6 tools could be found on the internet. But those 6 tools are a must have. If your on Hackforums or any type of these forums, then you have to download these tools. Its like a standard for cracking and fucking with the person you hate. So why is it bad? The dude is reselling it that's why. (But I guess if your lazy then you could consider him forming a tool pack like a service.) Also one of the tools crashed on me. (Bulk email sender.) My problem was that I was running it off an SD card, and it was slow. (Don't judge me and my SD card).

Conclusion:

For \$10 seems fair actually. For \$20 you could kiss my azz !! at least put it for \$13-15. 23 tools are functional and great. I couldn't even find some of these tools on other forums!!(Not to mention ones that are as clean as this) However, you should always run sandboxie and have a good proxy list.(FYI: love the proxy checker)
