Thread: [INSIDER SOCCER BET INFORMATION - 100% GUARANTEED WIN \[16 HOURS LEFT\]](#)

HypeGuy - December 16, 2021, 9:20 am

Every now and than I'm getting information on fixed soccer betting tips which I would like to share here.

Currently the information I have is for 28th this month. The odd is over 2 (I can't share the exact odd obviously).

VERY IMPORTANT:

-This game is not available on every betting platform. If you're interested in buying the game. please discuss with me which betting platform you're using so I can check if it's available there. Incase the tip is not available on your platform, I will share other platforms where you can make a bet on it.

I keep my right to deal only with people I want. Reselling the tip will ban you from having access to the future games I will be sharing and lead to a dispute towards you.

Purchasing the tip will also grant you 1 year access to my main VIP betting group where you can increase your winnings from the fixed game until the next one is available.

I will give full assistance to each customer and help each one in making their bet. You will be able to bet on the game worldwide. Some regions may require you having a VPN.

The price is \$500 and will be increased.

Accepted Payment Methods:

- Crypto
- AGC
- CS:GO skins

My discord for further contact - shibainutothemoon#7996

This looks juicy.

500\$ for a single game?

That's a promo price mate since it's the first time I'm offering this. It will be increased to few k and each next game will be more expensive than the previous one :)

EnG1ne - December 16, 2021, 10:04 am

What's the risk of a betting platform catching and on and blocking your account?

It must be pretty obvious if you normally bet safe and then go all in a few thousands all of a sudden.

If you plan on betting over 10k, I suggest you do a couple of accounts and make bets with them. They will not lock your account but they can deny your bet if you're doing a huge bet from 1 account.

Yeah I'd be highly skeptical of this, how many times we seen a promised game where the outcome will 100% happen and the only thing that was 100% was the user getting finessed.

Don't be naive. If OP accepts MM until the match is done and the end user profits, that's a different story.

Yeah, MM is totally fine with me. I'm here to do serious business, not to scam people :)

Bear - December 16, 2021, 11:39 am

So you're fine with a middleman holding the funds till the results are out? I'm down if that's the case.

Need to now which platforms and which country these games are in to believe you do have an in.

Need to now which platforms and which country these games are in to believe you do have an in. Yea, MM is completely fine. I will be updating the list with betting sites you can bet on in the next days as most sites don't have their program out yet as there are still 12 days left for the game.

RAT - December 16, 2021, 5:32 pm

Do the sites where it's available have enough liquidity for me to bet on it? Aka the win amount to be way more than \$500 for it to pay for itself.

What tiers are we talking about and what kind of bets? Also are we going against the websites TOS, risking of not getting paid out the winnings in the first place?

I'm totally interested in it - assuming I get more information about the payout and the websites. Please keep me updated and consider me as a potential early client.

Gonna use MM too.

The websites I'm going to suggest you bet on have way bigger liquidity than \$500 so you can be chill with high bets too (10k+).

We're not doing anything against the site TOS.

If you got more questions, kindly share them.

Bro, I'm doing everything with a MM. I will not risk my name for nothing :)

I'm running betting group and you can see there that I am not saying bullshits, I'm putting a lot of money into it and I want everyone to be able to benefit from it.

on the very very rare occasion this is real then obviously my apologies but you have to understand an MM means nothing, it could just be any other tip and you are just hoping it wins, and it keeps going until your luck runs out.

Just seems extremely fishy that someone doing low bets would have access to rigged games. If it happens to be true and you rack up a good amount of matches in a row then fair play

I've just seen handfuls of accounts do the exact same thing you've done and every single one has ended up being the most obvious scam

What do you mean I am betting low amounts since I am betting daily \$200-500 which is small % of my bankroll just because I am having a strategy and I bet smart. Also to let you know I live in a country where the normal salary is \$500-600/month and getting a valuable information/services is way more cheaper than in other countries.

I will be betting really big on the game myself too so everything will be more than clear.

2 days ago, at the Arab Cup semi-finals, Algeria Vs Qatar, FIFA wanted Qatar to win the game so badly that there was.... 18 minutes of stoppage time. I've never seen that before. But Algeria won nonetheless

One of the oldest scams out there...

- 1) No one with insider information will sell you a fixed match for a few hundred dollars.
- 2) Even if OP is doing charity and giving you a fixed match for basically free, bookmarkers will

instantly void your bet after their automated fraud detection systems pick up the suspicious betting activity for a low market match.

3) With there being no fixed match to begin with and assuming this is not a point spread / total bet, OP has a 33.3% or 50% chance of correctly predicting the outcome anyway depending on what type of bet it is. If he's right, he'll claim he had insider information all along and continue to make more threads, despite no one making any money because of point #2 anyway.

For anyone considering buying this please DYOR before doing anything.

Fixed matches do exist all the time. Look at England Premier league matches, when top teams draw or lose against weak teams. These are fixed.

Actually it happens daily or weekly in all countries when top teams lose or draw against weak teams.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

I'm not ruining any sales because you're not getting any, I'm pointing out the facts. You can use a MM for the first couple deals when a random tip (that isn't a fixed match) works out of luck then get more people interested so you can exit. Funnily enough BubbleKush did the EXACT same thing you're doing right now.

You're also from the EU. The jiggs up.

Bro, I'm betting over 50k on this game do you think I will risk this amount of money without being 100% sure that it will win ? And I'm pretty sure I'm getting sales as I have few. I don't get why you have to hate without a reason ?

You can say anything you want man, there's no solid evidence that you're betting that amount or the match is fixed. You have 0 reason to sell a fixed match on HackForums for less than a rack when you could theoretically make millions for yourself. You must be able to comprehend why

almost everyone is skeptical of this, I just happen to voice it. You talk exactly like BubbleKush, it's an aged account with a few threads and posts and suddenly huge money method threads are being made?

Trying to monetize it for 1/100th of what it could be worth? Something that someone who talks exactly like you has done several times before? Something which you could sell on another site/underground that's targeted for your niche? You seem extremely versed in selling multiple income generating methods and the way MMs work on a forum (going by your join date) that you don't have that much time on. BubbleKush is from the EU, you talk exactly like him, you sell almost the same methods, your delivery of the method is the same too... I'm seeing a pattern, as do others.

You just there copying some retards like yours bets and thinking you're a factor in the betting field and you know too much?

Dude I'm living in 3rd world country and I will outcash you all.

I'm betting big racks on this fixed game, I ain't just here talking nonsense.

Why if your tips are so good you don't place bets on them ? It's really easy to win 1.50 odds tips dude, you are not a tipster at all and those sources of yours are trash.
You have a really similar way of talking lol.

good ol' variance trick?

idk, imma go with the first bet, let's see how it goes...

Lol.

HypeGuy - December 27, 2021, 1:21 pm

Several hours left for the game. Price is reduced to \$500.

MM accepted, if you are high B-rating (100+) you can pay after the game wins.

if its guarenteed and you use a MM then i dont understand how the scam works? if game loses against my favor then MM gives funds back to the purchasor no?

it does sound odd tho

Bro the guy is really stupid, leave him alone. I even offer option for High B-rating people to pay me after the game wins (so instead of sending the money to MM they can use it and win bigger).

People who follow my groups know I'm betting with thousands daily. I'm 100% confident in the game and I'm going in heavy.

I believe Timo thinks that HypeGuy gives a "random" match.

If wins he takes the money, otherwise money back to the buyer.

I will never know the truth because I didn't buy. And I suppose a payment after match would not be allowed for me.

Bro you are at my group. You see the way I am betting. I'm going to bet tons of cash on this game, do you think I would do it if I was not sure ?

I am not in the VIP group yet, so I don't know all the details. But yeah, it seems you bet heavy.

I just have to admit I don't know the truth in this case. I'm always fully honest and transparent to people, that's my mission.

Since I gave the information about the tip few hours ago, the odds dropped with more than 15% because there are very heavy bets going on the game. Some sites started putting limits on the bets. The odd is well over 2 now but if you still want to get it on a nice odd, you should act faster.

RAT - December 27, 2021, 2:48 pm

I bought it. Odds have crashed a lot so far. Will keep you updated about the result.

Odds dropped with another 10% since I made this post in few minutes. If anyone is still interested in the game he can contact me fast as odds are going below 2 now at this point.

If the odds drop so quickly, it means a lot of people have this info.

Okay; let's say OP picks a random game and says team 2 to win.

The outcomes could be the following:

- You bet 1k on the match, pay a MM 500 euro, team 2 wins and you win the bet, MM releases the money to OP, OP made 500 euro and lost 0. You made 500.

- You bet 1k on the match, pay a MM 500 euro, team 1 wins and you lose the bet, MM sends money back to you.

OP made nothing but also lost nothing, you lost 1k euro.

See? OP is basically betting without risking any money but yours.

He can pick any random game and if he's right he wins a shit ton of money but if he loses he loses nothing at all, only you lose money.

Matched games are a myth (edit, i might be bit unclear here, matched games do exist but go for tens if not hundreds of thousands) and certainly not sold on forums for 500 euro.

You have to understand there are actually prison sentences on rigging outcomes of games, people putting their carreers on the line, you really think some nobody that just registered on HF would sell those games for a measly 500 euro?

Odds below 2.0 now.

Since fix is a fix, it's still all bettable, of course. The market is quite illiquid on sharp books, but he provides u with soft bookies that have higher limits so u can still ham down a lot on that game.

I agree with this post, I mean he would have too much risk in so doing. Not in terms of money, but in terms of losing the bet or not having future "fixed" matches.

Matched games are NOT a myth. Agreed, they are almost never sold on forums for 500 euros, though. They cost a lot and involve tons of politics and proper information management that gives the 'first hand' most bang for the buck. Especially for small leagues, where the markets are super illiquid and odds easily crashable.

Nevertheless, not giving up on him yet, let's see how it goes. Will update you all once I've got the result.

Bro this guy Timo has no clue what he is talking about. In order for the odds to drop with over 25% they are needed millions of dollars in bets in order for them to drop that much. We're a couple of dudes betting from HF, I wonder how his intelligent head will explain this. You are involved now in the game and you see with your own eyes how things escalated. While Timo is spreading his hate here, we're preparing for a nice day that will make us richer ?

Seriously do you guys all think a guy could come on hackforums to sell fixed sports betting tips? Use your brain guys, its just the usual fixed tips shit , give one tip to a user then an opposite one to the other..one guy wins and obviously the other loses, the winning guy would be convinced and then joins the so called fixed tips programme only to lose in the next few matches. fixed games might exist but they won't be leaked to an extent to which they will be shared on a forum like this.

In this specific case I think he gave the same match to every buyers, but just my idea.

I agree it would be very difficult to find a fixed match here.
