Thread: [Super Secure Self Hosted Bitcoin Shop in PHP/HTML/CSS! \[SALE!\] \[CLEARNET&ONION\]](#)

Vertinoxx - December 17, 2021, 10:00 am

SALE - PURCHASE HOSTING [15 EUR SINGLE SERVER 25 EUR DOUBLE]
AND GET SETUP FOR FREE! 2 SPOTS LEFT!

So it is finally done. One of the most demanded setups in modern time within the cryptocurrency self hosting; The Bitcoin Store, with remote/local hosted private node, written purely in PHP, HTML and CSS. Have a look :D

Sorry for the large image format. But it just gives all around a better idea how it looks.

Quote:

Runs just as smooth on onion hidden service as on clearnet. This is shop layout 1/2.

Shopping cart is accessable by the left corner and the navigation bar.

Fetches fresh address for each customer. Address is fetched either by a locally hosted node, or on a remote server.

Admin panel easily accessable from the browser. No need, ever to access the database wich is a huge security benefit. Edit products, check payments and keep track off orders just website access is enough. Ofcourse works 100% flawless on both clearnet and onion.

Prices:

1 Month Hosting + Setup with One Server - [SETUP - 15 EUR - Hosting 20EUR]

-

1 Month Hosting + Setup with Two Servers / Remote Node - [SETUP - 15 EUR - Hosting 25EUR]

-

Lifetime Setup on Pre-Bought Server(s) / Remote Node - [SETUP - 15 EUR - Licence 45 EUR]
