NEW YEAR SALE - 20% OFF ON ALL PLANS

Some Results (Since the creation of this thread)

Spoiler [\(Click to View\)](#)

An amazing comeback by Barcelona, after they were losing badly in the half and in the 3rd quarter. Starting the year with a great win, nothing feels better than that! Although 2 losses on the predictions we are still in the profit zone, we highly suggest following the recommend stake amount. Another great win!

Done. Let me know how you would like to proceed. Just an FYI I'm only interested in the sports/esports bets. I'm pretty good with crypto trading and currently taking time off from doing it.

I would love to receive a vouch copy, if possible, thanks!

Edit:

[ChromeOS](#) was nice enough to provide a vouch copy. I have never tried a service like this before, nor do I do a lot of sports betting. I can confirm that when I used the service, no signals have been changed afterwards to make it seem as if 99% of bets were won, even though they weren't. Everything was really transparent.

Of course it's still gambling, so in the end you will still need to some luck on your side to win. I have tried betting using HF's sportsbook myself and 2 out of 3 bets were won, although I lost a few bytes, because the winnings of the two bets I won did not cover the loss of the other. Whenever I had a question I got a quick and polite response.

Looking at the signals, there's definitely quite a few bets I could have made some decent profit with, if I would have chosen to go with them.

To sum it up, I think if you are looking for a prediction service, you will love this service. As always with gambling there is no 100% chance that you will make profit, so buy at your own risk. But I really enjoyed the vouch copy and if you're looking for a service like that and know the risks, I can totally recommend it!

Because all of the signals we post are in units, there isn't really a specific amount.

A unit is equal to 2% of the total balance. So, if you currently have €100, 1 unit equals €2.

Please keep in mind that, while we do our best to reduce the chances of losing, gambling is still gambling, and unexpected reversals or results may occur.

You should only gamble with money you can afford to lose.

As always, feel free to send me a PM if you have any additional questions :)

How long before games are bets released? I'm from Australia and run into issues with these services where the odds are given a few hours before game which is in the middle of the night for myself.

Hey, it really depends, but mainly around 12 hours before the game starts. Usually at 1PM (GMT+2)

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley

Yes, we fully provide all of the tips. Although, from time to time, we provide premium signals from our private source. The win rate for this month is 70%. It was a difficult start, but we are now standing on a good profit of 6.945 units.

As of us believing in full transparency, you can view both wins and losses at all times on our dashboard.

If you got any additional questions, feel free to send me a message here via a PM :)

We provide sports predictions; we are neither a casino nor a sports bookmaker.
