Have you guys heard of PlanetQuest? Well its this crypto game in development thats gonna be released on ImmutableX. It has HUGE potential.

Grab a free NFT and help me along the way. All you need is a Metamask on ETH Network.

You can view your NFT on the ImmutableX marketplace inventory.

If you have doubts about the legitimacy of this project, look up ImmutableX and you will see they are no joke.

Cheers!

Go for it my dude, and I would stick with it, cause games on IMX have the tendency of blowing up :D
