I would suggest to anyone dealing with caution. OP initiated multiple threads today for different services like LTC exchange, Amazon GC exchange and now bots/slaves.

I'm pretty sure he doesn't have anything of this and he expect us to go first even if his account is new.

Also, he's completly ghosting you if you try to reach him in convo/message.

DWC.

Definitely would not advise dealing with OP.

Asked for payment address and proceeded to say "I'll request and start a contract" as if we even came to any terms yet. facepalm
