Thread: [Need Spoofed Servers](#)

BreezyRainyDay - December 26, 2021, 10:19 am

I'm looking to buy some spoofed servers (IP Header Modification)
Can someone sell me a host or some servers?
Paying BTC, PM me if you can do this.

Doomslayer - December 27, 2021, 5:47 am

I used to sell, not anymore.

I'd recommend you check you spoofer.network if they are still operating.

Otherwise you'd have better luck in the hosting services part of the market. Just please use a contract, don't deal with sketchy people, and ask for a test server (most reputable hosts will do like a 1h free test).

Best of luck

can't wait for the feds to find this website!!!11!!!11111111

imagine buying from a website that sells "Spoofer Networks" instead of getting your own. lmao

it looks like this website was made by someone who uses HF.
