(Dec 31, 2021 09:00 AM)Howmygoad Wrote: [\[CITE\]](#) I will write my honest review for this product.

Before to say anything i will say i spent a lot of money in crypter on this market. And all of theses are fucking shit. Most saying private stub lmao private stub detected by 6/26 antivirus alright.

Today i have tried crypting service of Eksoder and i am entirely satisfied !

I have buy one static crypt with async rat.

It work perfectly with hidden startup.

One thing can be said : the delay but it's compensated by the quality of the product.

I can recommand this at 100% but don't use pureminer payload because pureminer is only cryptable by purecrypter and all of crypter owner will say this.

Good luck to future sales Eksoder and I will rebuy soon for sure !

For price 60\$ should be Great to get that runtime result and tested bot are well connected. As for trial i use async for dynamic services. To be honest this kind of crypt result is suit my campaign and i really satisfied as specially all my query are well answered. Not sure why WD detected by other author client but for me everything run smoothly even WD and other AV enabled. To test it further i will try to use this to do separate spread and see how long it can last before detection reach 7 above. This is just my review base on my experience as buyer. I hope all issue between Author and client can be resolve peacefully so that both party satisfied. I will update soon regarding the detection onward. hope for long term collaboration.

You can't find a better price for a crypt like this.

Bypass Win defender runtime like a dream when I just tested.

He also give you some good info if you don't know how to keep the file clean longer.

Fast delivery and very good support (remember this is a private stub so give him a moment to make it ready, it's 100% worth to wait some hours for that)

You can see scantime and runtime results at top ?

Howmygoad - December 27, 2021, 3:39 am

You can crypt x64 payload ?

MeW11 - December 27, 2021, 6:51 am

Looks like a good product glws

Perplex - December 28, 2021, 2:01 pm

Would like to see scan links. Is it with or without cloud protection enabled, for runtime results?

NotKover - December 28, 2021, 8:25 pm

Can you please provide scan results with the internet enabled to full with 240s time please and thank you.

Aekras1a - December 28, 2021, 9:47 pm

What are the stubs coded in, what exactly is a "dynamically injection" and what makes this 3 times harder to be detected by AV products, and what the actual * is with all the buzzwords?? Like a second-hand car salesman...

vladbadr - December 30, 2021, 11:33 am

ordered static and dynamic crypt, waiting to seller to provide results. will let you know how it goes..

Hi there. Currently I'm unable to provide encryption for PureMiner. Few customers also used PureMiner, but it can't be directly crypted.

Here is solution for all customers with PureMiner: Get some rat, for example AsyncRat. Purchase my crypting service where you will provide your Async client. After delivery you are getting crypted async rat client which can be used for stealth PureMiner client execution (Reflection or Runpe).

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.
