OP hit me up with a Vouch copy and for the first time it's something that I'm personally going to try in the next following days (after the new year) and update with my results.

The E-book is 9 page long but most of the pages contain images so it's short and to the point, the method is something I've thought of in the past but didn't went through with it as I was missing something that OP took care of and made a bot for it.

You will need to invest money to make it to work, you can't do it without investment. Time is also needed but definitely not hours per day as most of it the bot already covers up and you just need to take action on it.

benkhalil3cpa - December 30, 2021, 11:56 pm

Thank you .. the sales is running

LMK if you are still giving out vouch copies, I can try out the method with an investment and give a detailed review & screenshots of earnings.

Does it have anything to do with Afiliate Marketing, Mass Emailing, CPA, eWhoring, Forex, Crypto trading?

No worries, would of been nice to see a seller having multiple reviews rather than relying on a single user.

First of all I would like to thank benkhalil3cpa for giving me the opportunity to review this product and I want to publicly apologise for the long wait.

What do you get after purchasing this product?

After purchase you get an e-book and access to a tool that will play a major role in order for this method to succeed, as well as a buyers role in a discord sever that opens 4 channels with more information and day-by-day updates.

The E-Book

The ebook is 9 pages long (8 + title page) and has both images and links in order to provide more insight. Overall the method is very simple and easy to understand for someone with prior experience, however it could be a little confusing and more time consuming for someone who's just getting started in the crypto world.

You are provided with links for useful tools that will help you to succeed.

The Tool

The tool that you get access to is very simple to understand and once you do the method a couple of times it becomes as easy as 1-2-3.

The Method Overall

Personally I have never seen this concept before and after reading heaps of crypto-related methods - I have to agree with what the seller states in his FAQ - It is a totally genius strategy.

You do have to realise that there is some risk involved here (as with crypto in general) but with some basic risk management + with the tools provided you can basically evade negative outcomes.

You do need to invest some money, but you can start with any amount and increase it after you feel comfortable about the method. I personally started with 50\$ and I consider that to be a decent starting point.

Depending on multiple factors, you can realistically start profiting 30 minutes after starting, this does not require constant work and putting loads of effort into it, it's more about your ability to use timing in your advantage.

The seller him self is pretty available and in general seems like a friendly and helpful guy, thus if you are a complete beginner - I'm confident that you will the effort from OP's side.

Since I mentioned starting with 50\$ BNB - I assume you're anxious to know if I made some money? The answer is YES!

I had access to everything for a week and I was able to triple my initial investment. But this was done in a very passive way, due to the fact I had loads of private stuff and did not have much more time then casual 25 minutes in my lunch break.

The best part about this method is that it really cannot get saturated or patched, due to the nature of it and that it is completely whitehat.

I can confidently say that if I was a buyer of SpotHub - I would totally not regret my purchase!

Once again I would like to thank you for letting me review SpotHub and best of luck with sales!

Bought method, so far I know about method and it's nothing unique but it's make in smart way.

Also there is few good information in ebook which I didn't know about and which help a lot.

Method cannot be saturated and will work for a while.

I can see earning proofs from his customers in private channel so thing is work, as I have everything ready will start with method shortly and as soonest as I return my investment will write review.

There is risk involved but at the end of the day from my previous experience you should finished in profit

So far OP is very friendly and answer on few of my questions.
If thing is work it's worth buying.

Does this method involve physical work? Do you need to buy something /send something?

How long does it take to do the method AND see earnings in your account? Not "theoretically", I mean from start to finish

I would like to give my final review, was take longer than expected but I just wanted to be sure that is work and it's work.

Method is related to crypto and involve risk, but in my run I never lost more money than I invested, what I mean at the end I'm still in profit.

I was think that I have experience with that, but indeed I'm still learning, and as I will continue with method I guess that in future I'll be more successful with method.

Most important of all is that I was return my initial investment of 200\$ how much I was paid for method and I'm still making money.

Method can be done on pc/tablet/phone but from my experience on computer is the best as is much easier to do tasks than on mobile, maybe that's just me, but for sure method can be easy done on phone.

Method is easy enough for to do and it's not time consuming but you have to be fast to get more profit.

Overall OP answer on all my question and ebook which he provide contain all information which you need.

Also as I state before this method cannot be saturated and will not be saturated any time soon, and in this method I guess if more people do that you have more chance to get more profit :D

So this one have my vouch!

I was start with 1bnb and atm I'm on 1.8 bnb, so almost double, there is no time limit it's really up to you when you decide to pull trigger to invest money and take it out.

If you spent more time focusing on method you will probably earn more, so to hard to say, personally in total in about one week I was spent about 3-4h in total, didn't check honestly as there is no much to do just keep eye on few things, so I was do that while doing my other stuff.

A few posters mentioned there is "risk" involved.

What does the risk entail? Risk losing money? Blackhat risk? I have accounts at all the big centralized crypto exchanges, is there any risk for the accounts to be banned?

Can the risk be managed in anyway? Is the risk related to you not paying attention or doing enough work, or does it depend on what the crypto market does?

I'd appreciate an answer, without giving the method away obviously.
