He's offering a public method saying that it is private.

Here's the method I know (These are the links I know to get the SAME service that's in his ebook)

Now here's what @NSA was referring to if you look at the screenshot and search what I search it shows on the FIRST page with his ebook link.

Also I did try his way this morning just out of curiosity cause I know my was the exact same thing it use to be easy when they first started the program but the credits was only for 12 months and not unlimited as the seller stated so when he said that it spark me to make the purchase maybe it was different from the public but it's NOT.

PS: HE ALSO SAID IF IT DOESN'T WORK HE'LL REFUND ME, WELP I SHOWED PROOF IT DOESN'T WORK.

Summary: F6 is one of MANY companies that offer this third party deal to take advantage of big companies such as IBM,AWS, OVH and many more. The seller has no knowledge on what he's selling. As I showed before many companies offer this and the method is not private at all.

I was going to buy this discounted copy too [Host](#) but than I saw webdev77 post on his thread and stopped myself from starting the contract. Hopefully this guy refunds, shame if he waste 13 years in this forum for \$150.

NSA - December 27, 2021, 6:51 pm

Sad. Can vouch this is a public method. Sorry he got ya.

?Border?ineExtr(A) - December 28, 2021, 3:46 am

So to summarize, he was confused about it from the beginning, since he expected me to perform a service, when it's in fact a product where I teach you how to do it yourself (which I would say is much better). He immediately asked for a refund afterwards, talking without even trying it and trying every excuse after the delivery. I suggested multiple times that he should try out the other cloud providers that are included in the method, cause you can get up to \$100k in other cloud providers too even without IBM which he supposedly knew about (although it's not the same on what he was claiming on the links).

I don't see any reason to request for a refund when the method is working as advertised and I suggested multiple times that he ACTUALLY TRY IT first before disputing. He simply kept threatening to intimidate me for a refund, which I have to say isn't working as well as he intended. Just on principle I don't condone this sort of behavior and I wouldn't agree to a refund.

That was cleared up with the staff where I provided proof that the method is whitehat and completely legitimate. Webdev77 thought it was another method at first.

Sorry but you can't vouch when you clearly have no idea what sort of method it is. You've never purchased or reached out to me about it, but you've drawn assumptions from some other people and jumped to conclusions without any sort of evidence. Please refrain from doing so on any of my threads or where my products are discussed. If you're interested in purchasing a copy, I'd be happy to give you a small discount so you can verify by yourself that it's not a "public" method.

Host - December 28, 2021, 5:17 am

So you not going to screenshot my links to the way I know that I told you about? Lol say no more, looks like ya method finna come public and a banned hammer coming. Give me a few at work now.

DaroccoRoco - December 28, 2021, 5:47 am

If you would be so clean, you would not remove links from screenshots.

?Border?ineExtr(A) - December 28, 2021, 8:14 am

Those weren't my links so I didn't post them - plus they're not the same as what you get through the ebook. I don't know why everyone keeps hypothesizing without even reading the method. The method works and it's not easily found on Google lol as they keep suggesting. This thread is simple sales trashing for no good reason.

Just pulled up to the gym but I'll be done in 2 hours, ima expose you so hard I hope they banned yo ass in the next 24hrs cause you let it get to that point. Ima break it down with my links that offer the exact same thing then ima break it down how @NSA referred your link on the ebook is like the first two pages on google search. Im highly piss cause now I have to take time out my day to come up with screenshots but don't worry I'll break it down to the bone. Thought you was legit but I'm happy I get to expose a high rep "OG".

It was nice knowing ya, I'll take the \$150 lost to get a piece of shit seller like you off this forum. I'll be happy to know that you won't be able to scam anymore on HF.

Also proof has been added to the thread, hopefully staff give me permission to post ya ebook for proof.

Staff doesn't get involved in deal disputes.

You deal at your own risk.

Nobody. We do not get involved in deal disputes.

This is mainly why I don't purchase e-books from anyone because I know that they are not legitimate in my personal opinion. Shame to see a 2009 member [?Border?ineExtr\(A\)](#) trying to sell top ranked SEO google search results for money. ?

Host - February 2, 2022, 10:07 am

A reminded this guy is a shit bag and I'll post the method freely once I find the eBook. Oh yeah he's trying to resell again but don't worry I got you guys back. He ain't making no money till I get my money back shit bag.

?Border?ineExtr(A) - March 1, 2023, 1:23 am

I've repeatedly tried to deal with Host privately, offering him my updated product (since he only got access to the first version) which contains 5+ methods to get up to \$100k in free cloud credits from multiple providers like AWS, Google Cloud, OVH, IBM, Azure etc (\$500 value, when he paid considerably less), however this guy is impossible to reason with - just look at his posts and namecalling etc lol. Whereas I've got multiple positive reviews on my sales thread, several members reported successfully getting thousands of dollars for free and I've personally made 5 figures by

mining ETH on AWS on multiple geographical zones with high-end hardware. Honestly you're too childish to even deal with, and I regret the fact that I gave you the time of day already. Cheers, take care and grow a pair before you talk to me kid.

EDIT: And if any of you talk shit without seeing any proof from Host, please link your services here. I will buy, then leave you a negative B-rating, open a dispute calling you a scammer then sales trash repeatedly. I'd love to see how you feel, especially if you sell something expensive so you can lose out on thousands of dollars. Wouldn't feel good, would it?

EDIT 2: And if ANY of you, and I mean literally in this entire forum, knew this website from the screenshot at the time he posted it (3-4 people max might have had knowledge of it), then probably his accusations could actually stand on his two measly feet - but I'm pretty certain that no one can stand here and lie to my avatar by claiming that it's a public method lmao. I've been an early user and got over \$100k in deals on multiple occasions just from this platform alone - so maybe rather than stand around and waste your time pointing fingers and complaining about non-existing issues, you instead use this time to apply something new that you learned here (courtesy of my awesome product and Host's shitty behaviour with marketplace leaking, isn't this against the rules @staff???) and make some real money.

And just to be clear, he didn't even follow the method correctly lmao cause I describe the steps in detail and it's impossible for him to setup everything as required in such a short amount of time, as when he claims he "tried" it. And if you wanted a refund OP, do you really think that the best course of action was to go through all of this (negative rating, sales trashing, dispute, namecalling) & then trying the method "just to save face" cause I called you out on wanting a refund 20 minutes after delivery lol if you're broke just say so and I could have given you a free copy instead of dealing with all this hassle for like a hundred bucks lmao

User wants me to stop the dispute and remove negative rep. It's common sense, you fix the problem then I remove. Nice try though

Lol it's been a year btw, took this guy a year to offer a solution and still trying to get over. Let that sink in folks.

With the way deal disputes have been handled as of lately I hope you two can resolve this. I can't believe it's already been over a year since I replied to this dispute myself.
