Thread: [Starting with cryptocurrency](#)

hose10 - December 30, 2021, 5:51 pm

I am thinking of buying a Udemy (warez disallowed) course to start learning about cryptocurrency as i cant find a structured guide on the internet. Do you have any other suggestion where i should start learning? Is this course worth it? course: <https://www.Udemy> (warez disallowed).com/course/the-complete-cryptocurrency-course-more-than-5-courses-in-1/

There's lots of stuff on youtube. Like, a shite-ton. But if the Udemy (warez disallowed) course is \$10 or whatever, then sure, why not - I like Udemy (warez disallowed) courses on coding for their structure and the amount of content you get.

Me too sometimes, so yeah, if you're willing to pay for a course, they do often give you a nice structure - but I've found them fairly hit and miss. Coding courses on Udemy (warez disallowed) tend to be great, but the business ones, meh, not so much I've found, they just tell you shizz you already know or can figure out.

There is lots of things in CRYPTO

Mining, Stacking, Day trading, long term.. But with internet you will find everything from A to Z, basics things about crypto are really easy to understand, and after if you like it it will not be hard to understand each thing of cryptow0rld
