Thread: [I have UNLIMITED App Store Credit, What Should I Buy? Any Software/Apps/In-app tings?](#)

So I have a way to get unlimited credit on App store, but unfortunately you cannot buy real items anywhere only digital shit.

Do you know of anything I can buy? Or maybe even turn the credit into CASH? Let me know! ?

This would 100% be your best bet to make some quick cash.

if you can spend money in games, then go to the games that have a big pay to win crowd, and advertise cheap game packs.

This is a huge industry, and easily flippable if you find the right game and the right buyers. People spend thousands a month on mobile games without batting an eye. If they can get the new SUPER MEGA ATOMIZER PINK WITH YELLOW TINT LEVEL 569999 WEAPON for half price, they will do it. I talk from experience.

Breaking the initial distrust is the hard part. I advice you to start playing the game yourself, and spend alot of "money" in it. Then make a clan and slowly start pushing to them. Big money can be made here if you have a way to get the stuff free.

It works for any in-app purchases. I just can't seem to find any games I could sell instantly. Hmm maybe I'll check out Runescape maybe you can buy bonds or something in iOS?

I think CoC and CoD Mobile both still have large active player bases that are interested in buying loaded accounts.

Never played any, this is just what I have noticed are hot for selling accounts-wise on mobile.

Cheers! ?
