Thread: [Cracking old Bot for WoW\(HB\)](#)

Terro - January 6, 2022, 10:44 am

Hi?, I'm new to the forum. Can anyone help me crack Hon0rBuddy HB. An old bot for wow (World of Warcraft)

I put you the bot file. The offsets and the old auth local. Because before it was always cracked locally. Often we needed to change the hosts or IPv4 to add the addresses the bot uses.

But after patch 5.4 this was never done. And I'm looking to use the bot on patch 5.4.8. It's what month of difference.

[mega.nz/file/3NZAyZJZ#Nuuz6cB6M886JUagXE7klppVKYEjoKIV0FtnENTctTM](#)

reward for this crack is 200€!

Terro - January 8, 2022, 11:03 am

Ps: wrote me no pm I can't answer

Terro - January 13, 2022, 4:00 am

This bot is written in C#. Any advice or help is welcome

Terro - January 19, 2022, 8:08 am

I put the price at 200€. If you know c# try to help me!

Terro - January 26, 2022, 5:23 am

Small reminder it is written in C#

SIM-4932765 - January 28, 2022, 10:19 pm

Taking a look at it at the moment.

Cleaned all the code and now I'm looking at the sourcecode to see where does it checks login details and more.

Cracked. Hit me up asap :D

Waouh! Hello, did you succeed?

Terro - March 13, 2022, 5:04 am

Still looking for help to crack this bot.

If you know c# don't hesitate to help me. I give you 200€ for this work!!!!

Didn't last Crack it already? Or did he crack the wrong thing? I will take a look and get back to you. Is there anything else you need? Geolock removal like Incog wrote?

I just need it to work 100%. If you can get it to work locally, Geolock doesn't matter. I think. What is Geolock?

???

Terro - April 13, 2022, 3:10 am

Hello I am still looking for a pro in c# to make a local version of the bot

Terro - April 14, 2022, 5:51 am

I found the domain names, I add them in hosts.

But the bot has a security for local connection

I managed to locate this error. But I don't know c# so well to fix this problem.

Maybe you have some ideas

Terro - July 17, 2022, 9:43 am

hi i managed to set up a local version. the offsets were just encrypted. I don't even need to touch the exe.
