whats the best vpn with port forward and no logs

VNT - January 12, 2022, 6:57 pm

I like azure Idk about port forwarding but they claim to keep zero logs :)

Jarvn - February 6, 2022, 9:24 am

I use Mullvad VPN, it doesn't store any logs idk abt port forwarding

Mdrp78 - April 15, 2022, 1:29 pm

Super cool j'adore ses génial mec

zrdx - May 10, 2022, 4:29 am

ovpn is the best in my opinion, so is ipvanish, N-o-r-d

Exodus - May 10, 2022, 9:37 am

Neither ipvanish nor N-o-r-d allow port forwarding.

Pete_Stevenson - May 10, 2022, 2:18 pm

Nor AzureVPN allows that.

That's interesting:

ovpn Wrote:The port number will be in the range of 49152–65534 as we follow RFC6335 guidelines regarding assigned port numbers.

<https://www.ovpn.com/en/blog/portweiterleitung-mit-ovpn>

A brilliant idea, because all the standard ports used for RATs are not among them.
Just today we had to terminate the accounts of three customers after Spamhaus entries:

RemcosRAT, AsyncRAT, NanoCore: No VPN provider wants crap like this, because it is the cause of Spamhaus entries.

Hence the restrictive port forwarding rules.

starktonyinfo - May 13, 2022, 7:03 am

Hey Guys, Please have look at OSVPN Solution with port forwarding. the trails subscription is start with 1 \$ only for 24 hours.

SilenceHacker - May 13, 2022, 12:58 pm

Right now I'm using hide.me as a VPN, but I was wondering if there is another free VPN that's more trusted by the community? ovpn and mullvad seem like they don't have a free option available.

GoldenList - June 26, 2022, 11:48 pm

Don't even bother with a free VPN, They have less incentive to protect your data than your ISP. If you're not paying for the product you are the product.

Satoshi846 - July 9, 2022, 1:55 pm

I recommend running your own VPN on a VPS. Wireguard or OpenVPN are good choices but you can use whatever you want. You can manually set it up or use one of these scripts.

github.com/angristan/openvpn-install

github.com/angristan/wireguard-install

For port forwarding you're going to need to add a firewall rule. Here's an example for nftables. This rule will need to be put in the prerouting chain. If you're using iptables google some examples.

Example #1: `ip saddr 0.0.0.0/0 ip daddr 1.2.3.4 tcp dport 4321 dnat to 10.9.0.4:4321`

In this example, the server's public IP is 1.2.3.4 and the TCP port you want to forward is 4321.

Example #2: `ip saddr 0.0.0.0/0 ip daddr 1.2.3.4 udp dport 9876 dnat to 10.9.0.4:9876`

In this example, the server's public IP is 1.2.3.4 and the UDP port you want to forward is 9876.

Pete_Stevenson - July 10, 2022, 3:24 am

We offer remote port forwarding and don't log user IPs.

An annual account with a shared IP costs €30 EUR: <https://nvpn.net/order.php>

As long as you don't use RATs behind our servers that lead to Spamhaus entries, you are welcome to purchase an account from us.

chnda25 - August 6, 2022, 5:58 pm

I want to buy vpn but i have some questions to ask. please send me a private message

P1N7 - August 6, 2022, 8:02 pm

Try using NVPN or you could buy a vps
