We pride ourselves on our rocket low prices, with offers from as little as 10 EURO for 6GB+ of RAM and much more. Our stock is calculated live, when a node sells out, we'll get another, and another, and so on. We intend to only host as little as 3-6 clients per node.

Our Current Stock:

Yea, we're not operating via a website, and we don't plan to, we've got some sp00ky stuff on the way, stay tuned =) - we do free reinstalls etc manually and offer some of the cheapest packages (starting at 10 EUR for over 6GB of RAM).

(Jan 10, 2022 01:40 PM)Incog Wrote: [\[CITE\]](#) huh? why is it on your thread and design then

or did you change your mind on having a website

its on our thread design as it is our domain, our domain will be used for more than just a website - we will have one eventually, you just won't be able to buy anything from it / it will just be a static page that shows what stock we have as we're going to focus on maintaining OFFERS for different machines etc rather than static product ranges.

I have few Questions:

- do you provide vps with windows OS
- are all the ports open by default
- do you allow rats

1. No, only Linux.
 2. No, but you can open any ports you want.
 3. We allow anything that doesn't generate abuse reports.

How long will a vouch copy last? How long are these servers going to be online?

Are these machines stolen?

THESE ARE NOT STOLEN.

Vouch copies will last 24 hours, however, paid servers are monthly.

ThatDevAaron - January 21, 2022, 8:47 am

We've got much more sock available after new node deliveries.

website <https://ghostno.de/> is now up.

ThatDevAaron - January 24, 2022, 2:38 pm

We've heavily updated our stock with many more options.

Milk - January 26, 2022, 12:21 pm

still offering vouch copies?
